LDAP verification failed. Connection to {hostname} closed.

213 admin October 9, 2024 Common Errors & Troubleshooting 6510

LDAP verification failed. Connection to {hostname} closed. in ubuntu

If its Ubuntu 16.x not supported do these on the server and try again. Simply link /etc/ldap dir with /etc/openldap would fix the issue.

```
:~# ln -s /etc/ldap /etc/openldap
```
