What are the security measures to ensure data security?

122 admin October 3, 2024 Technical 6683

Measures to ensure data security

Following are the encryption algorithms used in ezeelogin to ensure that the data stored in ezeelogin cannot be compromised.

The User passwords and security codes stored in the ezeelogin database use multiple rounds of SHA512, SHA256, BLOWFISH, or DES depending on what's supported on the system (since v6.0.2). The UNIX System User passwords use a crypt. The SSH private keys to servers use 4096-bit RSA keys and the server root passwords, secure information about servers stored in the database use RSA encryption.
