What are the encryption technologies used to secure my data?

126 admin October 3, 2024 Technical 6610

We have made use of the latest cipher and encryption technologies available in the industry today to ensure data security

The User passwords and security codes stored in the ezeelogin database uses multiple rounds SHA512, SHA256, BLOWFISH or DES depending on what's supported on the system (since v6.0.2). The UNIX System User passwords uses crypt. The SSH private keys to servers uses 4096 bit RSA keys and the server root passwords, secure information about servers stored in the database uses RSA encryption.
