SSH Jumpbox behind firewall

13 admin September 2, 2024 Getting Started 11150

Can an SSH jump box be installed behind a firewall?
What will the IP address be when the SSH gateway is installed in the LAN?

Overview: This article describes how an SSH jump host can function behind a firewall within a LAN and provides commands to find your public IP address if the host is behind NAT.

Yes, an SSH jump host can be behind a firewall and would work within a LAN.

Run the command on the SSH gateway server, and it will display the IP address for which the license needs to be issued if your SSH gateway is behind a NAT.

```
root@gateway:~# wget -qO-http://ezeelogin.com/myip
```

or

```
root@gateway:~# curl ifconfig.me
```

Refer to detailed articles to install and configure SSH gateway:

Setup and configure SSH jump server
