"Error: LDAP extension is not installed".

142 admin October 4, 2024 Common Errors & Troubleshooting 12214

How to solve "Error: LDAP extension is not installed" while clicking ldap tab?

Overview: This article helps to resolve the "**Error: LDAP extension is not installed**" encountered while clicking the LDAP tab in Ezeelogin by installing the php-ldap extension on CentOS, Ubuntu (for PHP 5 and PHP 7), and Debian (for PHP 7.4).

The "**Error: LDAP extension is not installed**" indicates that the php-ldap extension is missing from your server configuration. Follow these steps to install it based on your operating system:

1. Centos

```
root@gateway:~# yum install php-ldap
```

2. Ubuntu

```
root@gateway:~# apt-get install php5-ldap/php7-ldap
```

3. Debian

```
root@gateway:~# apt-get install php7.4-ldap
```

Ensure smooth LDAP functionality in Ezeelogin by installing the php-ldap extension according to your server's operating system using the steps provided above.
