How can i add more than one public key to ezeelogin user ?

153 admin October 4, 2024 Tweaks & Configuration 7580

Is it possible to add more than one SSH public key to ezeelogin?

Overview: This article helps gateway users in adding more than one SSH public key to the Ezeelogin system, allowing users to log in seamlessly without being prompted for passwords.

Yes, gateway users can add more than one SSH public key for passwordless authentication to log in to the Ezeelogin backend(ezsh).

Step 1: Add more than one key to the **Authorized keys file** of the **gateway user**.

```
root@gateway:~# nano /home/ezeelogin_user/.ssh/authorized_keys
```
