

Error: Reached maximum number of servers allowed by current license. Please upgrade license to add more servers.

154 admin August 10, 2018 [Common Errors & Troubleshooting](#) 5308

- You will have to upgrade your license so that you can add more servers
- If you have already upgraded and still keep getting the error, then make sure that you flush the cached license. In order to flush the license, simply login into the software GUI and click on the **license tab** and it should fetch and display the new license.

The screenshot shows the ezeelogin web interface. On the left is a dark sidebar with a menu containing: Servers, Web Portals, Users, Access Control, Settings, Cluster, Command Guard, Account, Help, License (highlighted with a red arrow), and Feedback. At the bottom of the sidebar is a 'Collapse' button and the text 'Powered by ezeelogin.com'. The main content area has a wood-grain background and displays a 'License' window. This window contains two tables. The first table lists license details: Type (Leased), Valid till (Fri, 01 Jan 2021 05:29:59 +0530, circled in red), and Gateway Type (primary). The second table lists system information: Licensed IP (14.98.32.126), No. of servers (100), and Build (381). The top right of the interface shows a user profile icon, the text 'Welcome, manu', and a 'Logout' button.

License	
Type	Leased
Valid till	Fri, 01 Jan 2021 05:29:59 +0530
Gateway Type	primary

System Information	
Licensed IP	14.98.32.126
