## Current License Limit Reached: Upgrade to Add More Servers

**Overview:** This article explains how to fix the "**Error: Reached maximum number of servers allowed by the current license. Please upgrade license to add more servers**."  by upgrading your license from the billing portal and flushing the cached license via the Ezeelogin GUI if the error persists after the upgrade.

**Step 1:** You will have to <u>upgrade your license</u> so that you can add more servers.

**Step 2:** If you have already upgraded and still keep getting the error, then make sure that you <u>flush the cached license</u>. In order to flush the license, simply login into the Ezeelogin software GUI and click on the **license tab** and it should fetch and display the new license.
