## Stream SSH sessions in real-time

---

**Overview:** This article provide step by step instructions to stream the SSH sessions of gateway users in real time by enabling streaming with time interval settings.

---

**Step 1:** Login to Ezeelogin GUI, navigate to **Users** -> **SSH log** and click on the **View** button. If the tab is not visible then ensure that the user has the privileges to view the SSH Log in [Access Control](#).

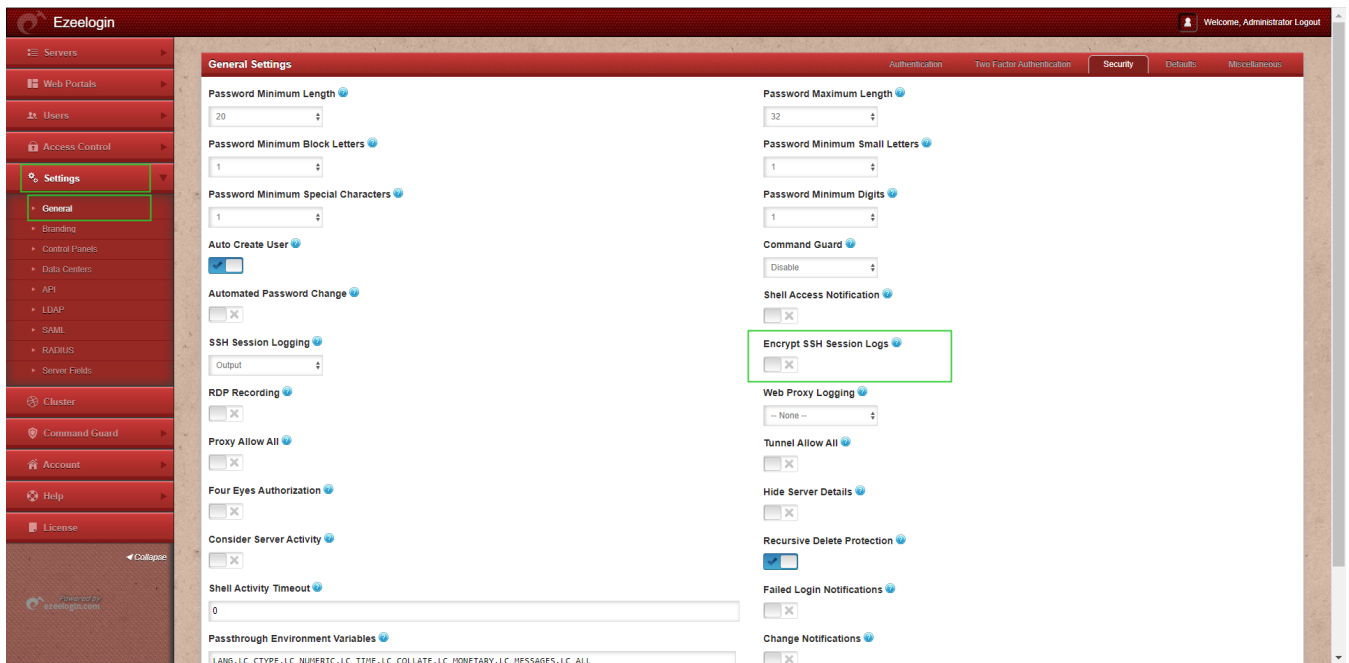

The screenshot shows the Ezeelogin web interface. On the left is a sidebar menu with options like Servers, Web Portals, Users, Access Control, Settings, Cluster, Command Guard, and Account. The 'Users' section is expanded, and 'SSH Log' is selected. The main area has a search filter with fields for User, Server, Log Type, From, To, and Rows Per Page. Below the search filters is a table of SSH logs.

<input type="checkbox"/>	User	SSH User	Server	Log Type	Status	Encryption	Time ↑	mExec ID	Actions
<input type="checkbox"/>	+ evan	root	ubuntu.noc.com	output	Ended	0	2023-01-14 13:35:32		[Icons]
<input type="checkbox"/>	+ evan	root	ubuntu.noc.com	output	Ended	0	2023-01-14 13:31:37		[Icons]
<input type="checkbox"/>	+ evan	root	ubuntu.noc.com	output	Active	0	2023-01-13 16:43:20		[Icons]
<input type="checkbox"/>	+ evan	root	ubuntu.noc.com	output	Ended	0	2023-01-13 16:42:32		[Icons]
<input type="checkbox"/>	+ admin	root	ubuntu.noc.com	output	Ended	0	2023-01-13 14:33:08		[Icons]

**Step 2:** Click on the 'Enable streaming button' and set the interval for streaming.

The screenshot shows the SSH log output window. At the top, it says 'evan > root@ubuntu.noc.com (SSH Output) 2023-01-13 16:43:20'. Below this is a red bar with the text 'SSH log'. To the right of this bar is a control bar with a button labeled 'Disable streaming' and a dropdown menu showing 'Interval: 5 seconds'. The main area displays the output of the SSH session, including system information and login details.

**Step 3:** Ensure that 'Encrypt SSH Session Logs' is disabled in Settings -> General -> Security for live streaming to work.

SSH Live streaming is possible only for ongoing ssh sessions.  
SSH Live streaming is possible only if 'SSH Log Encryption' is **disabled**.
