Database connectivity credentials and configuration file

163 admin October 5, 2024 Migration & Maintenance 8492

How to view database connectivity credentials and configuration file?

Overview: This article provides details on database configuration files in Ezeelogin and includes steps for viewing database credentials.

Step 1: The database configuration files are stored on the Ezeelogin server in **/usr/local/etc/ezlogin/ez.conf**.

```
system_folder /var/www/ezlogin/

force_https no

uri_path /ezlogin/

db_host localhost

db_port /var/lib/mysql/mysql.sock

db_name ezlogin_pods

db_user ezlogin_mkn

db_pass Z%%e$^GZ{kB4EDD

db_prefix djw_

cookie_encryption_key kRF*uAKF_bB/e54DD

cookie_name gpy

cookie_path /ezlogin/

www_folder /var/www/html/ezlogin/

admin_user superadmin

mysql_encrypt no
```

Step 2: In order to decrypt the **database password** from Ezeelogin configuration file, run the following command on the jump server.

```
root@gateway:~# php /usr/local/ezlogin/eztool.php -show_db_credentials
```

Step 3: After executing the above command you can see the database credentials as shown below:

```
root@gateway:~# php /usr/local/ezlogin/eztool.php -show_db_credentials

                _          _
  ___ _______  ___| | ___   __ _(_)_ __
 / _ \_  / _ \/ _ \ |/ _ \ / _` | | '_ \
|  __// /  __/  __/ | (_) | (_| | | | | |
 \___/___\___|\___|_|\___/ \__, |_|_| |_|
                           |___/
```

```
