

# Database connectivity credentials and configuration file

163 admin October 5, 2024 [Migration & Maintenance](#) 5963

## How to view database connectivity credentials and configuration file?

---

**Overview:** This article provides details on database configuration files in Ezeelogin and includes steps for viewing database credentials.

---

**Step 1:** The database configuration files are stored on the Ezeelogin server in `/usr/local/etc/ezlogin/ez.conf`.

```
system_folder /var/www/ezlogin/

force_https no

uri_path /ezlogin/

db_host localhost

db_port /var/lib/mysql/mysql.sock

db_name ezlogin_pods

db_user ezlogin_mkn

db_pass Z% %e$^GZ{kB4EDD

db_prefix djw_

cookie_encryption_key kRF*uAKF_bB/e54DD

cookie_name gpy

cookie_path /ezlogin/

www_folder /var/www/html/ezlogin/

admin_user superadmin

mysql_encrypt no
```

**Step 2:** In order to decrypt the **database password** from Ezeelogin configuration file, run the following command on the jump server.

```
root@gateway:~# php /usr/local/ezlogin/eztool.php -show_db_credentials
```

**Step 3:** After executing the above command you can see the database credentials as shown below:

```
root@gateway:~# php /usr/local/ezlogin/eztool.php -show_db_credentials
```

$\frac{\overline{a_1} \cdots \overline{a_n}}{\overline{a_1} \cdots \overline{a_n}}, \frac{\overline{a_1} \cdots \overline{a_n}}{\overline{a_1} \cdots \overline{a_n}}$

```
#####
# Ezeelogin Tool      #
#####
```

```
Checking environment... done
Checking license... done (0)
```

```
Enter the Ezeelogin administrator password: Admin!2345
Database credentials:
Host: localhost
Port/Socket: /var/lib/mysql/mysql.sock
Database: ezlogin_pods
Username: ezlogin_mkn
Password: P4&][*V]Qx3jn3n7A6@p6p7]G
Table Prefix: djy_
[root@localhost ~]#
```

---
