Setting in web panel when SSH Daemon is listening on non standard ports.

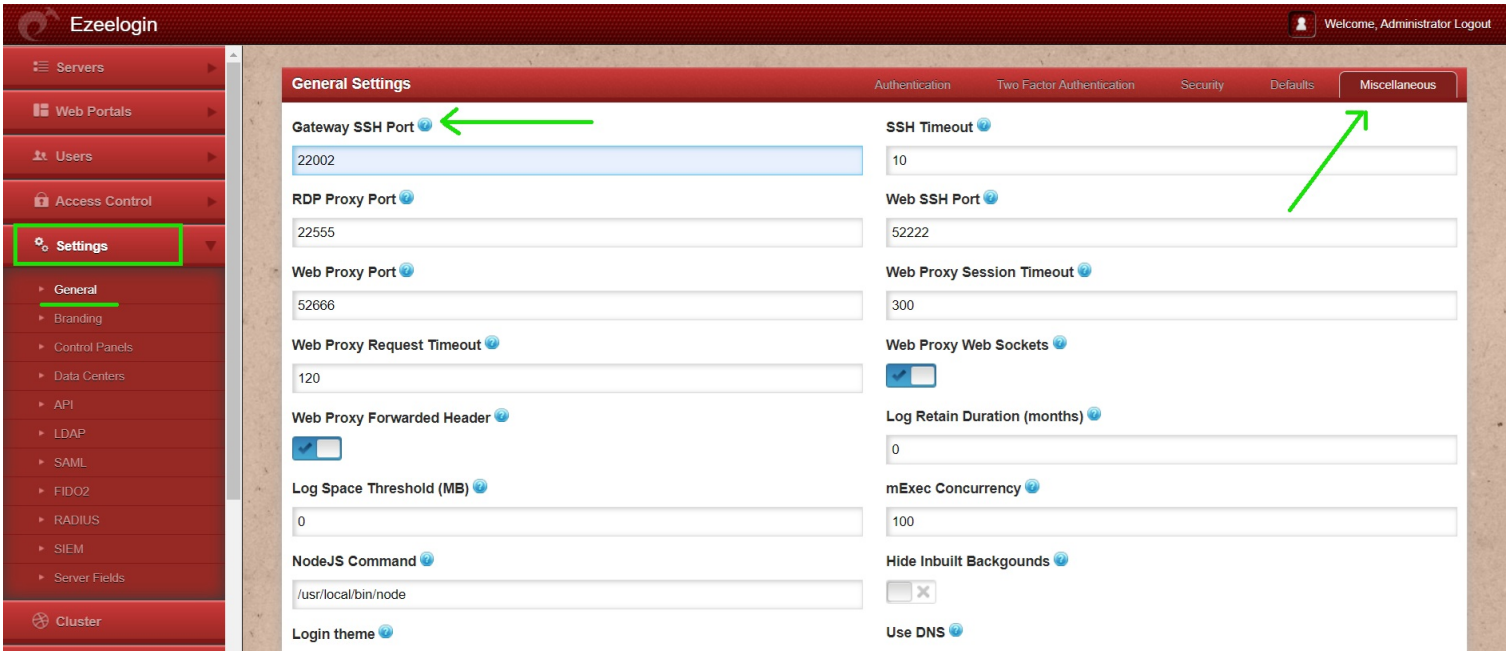

173 admin October 6, 2024 Tweaks & Configuration 8213

How to setup custom port number for SSH in Web panel?

Overview: This article provides an overview of setting up a custom port number for sshd when it is configured to listen on a port other than the default SSH port 22.

Sometimes, the SSH daemon on your gateway server would be listening on a non-standard port instead of port **22**. In such cases update the custom port under settings.

Step 1: Login to Ezeelogin GUI and set Gateway SSH Port under **Settings** -> **General** -> **Miscellaneous** -> **Gateway SSH Port.**
