How to copy or delete a file in jump server users home directory?

204 admin October 9, 2024 Productivity & Efficiency Features 13993

Using SFTP to copy and delete files in jump server

Overview: This article explains how to use SFTP clients to copy or delete files in a jump server user's home directory, including detailed steps for connecting to the gateway server and managing files.

Use sftp clients to copy files from the desktop to the gateway and to delete the files as well. The user first needs to sftp to the gateway server as shown below

```
sftp john@192.168.56.112
john@192.168.56.112's password:
Connected to 192.168.56.112.

sftp> ls
ezsh.log

sftp> put ioncube_loaders_lin_x86-64.tar.gz
Uploading ioncube_loaders_lin_x86-64.tar.gz to /home/john/ioncube_loaders_lin_x86-64.tar.gz
ioncube_loaders_lin_x86-64.tar.gz                                                    100%
11MB  18.0MB/s   00:00
sftp> ls
ezsh.log                          ioncube_loaders_lin_x86-64.tar.gz

sftp> rm ioncube_loaders_lin_x86-64.tar.gz
Removing /home/john/ioncube_loaders_lin_x86-64.tar.gz
```
