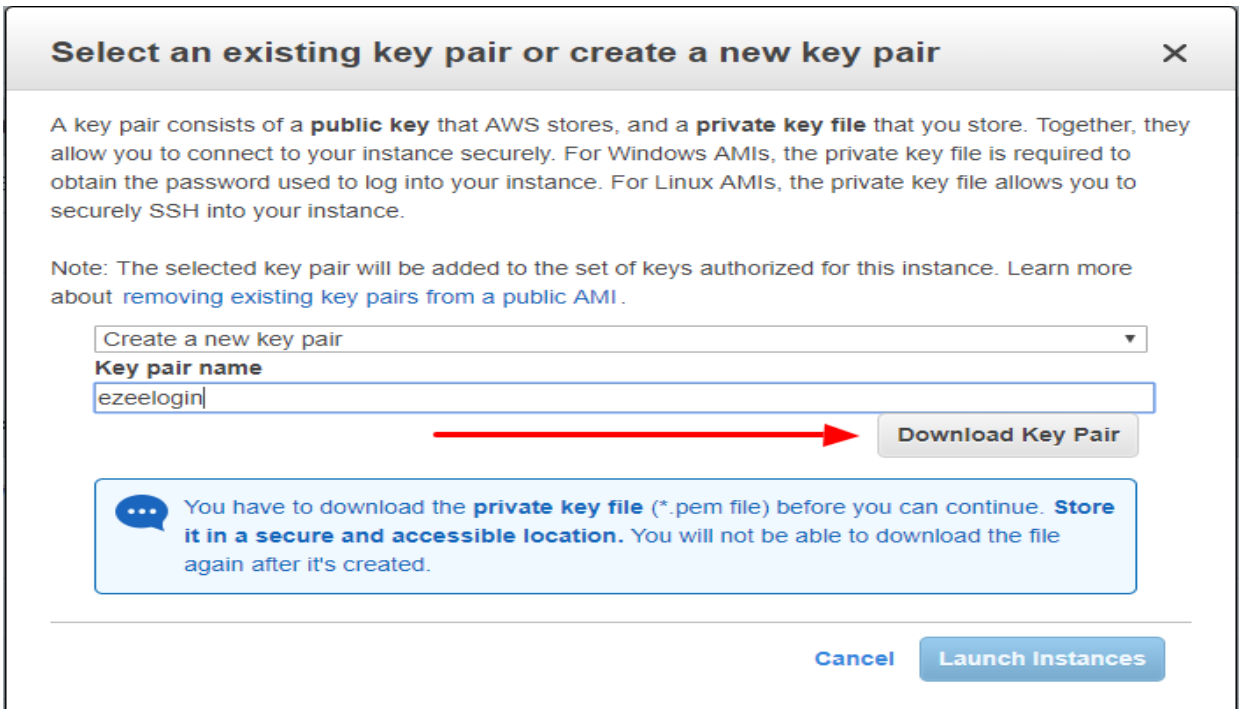
add amazon ec2 in jump server or aws jumpbox

210 Manu Chacko May 21, 2018 Tweaks & Configuration 7734

How to add amazon ec2 instance in ezeelogin jump server or bastion host ?

1. Get the private Key from amazon ec2 instance

You can download the key while creating an amazon instance .You will not able to download the key file after it's created.



you can download the key while creating amazon instance as shown in the above figure

2. Add the the ec2 instance to ezeelogin jump server

Click on server > add server

Add the public **Hostname**,**IP Address**,**Remote ssh user** and paste **SSH Private Key** download from the ec2 instance as shown in the below figure
