

Error: ENOENT while trying to access RDP after upgrading ezeelogin

Troubleshooting "ENOENT Error" on ezeelogin jump server

Overview: This article addresses troubleshooting ENOENT errors on Ezeelogin jump servers, focusing on terminating node processes or rebooting to resolve access issues related to missing files.

Error: ENOENT, stat '/var/www/ezlogin/application/third_party/mstsc.js/client/html/index.html'
If you get the above error while trying to access RDP after an upgrade, kill the node process running on the server or reboot the server.

```
root@gateway:~# ps aux | grep node
apache 14080 0.0 7.2 973928 73844 ? Sl Jun04 0:18 node /var/www/ezlogin/application/
third_party/mstsc.js/server.js
root 21949 0.0 0.0 103324 876 pts/3 R+ 03:10 0:00 grep node

root@gateway:~# kill -9 84011
```
