

How a user can set or reset Google 2fa in GUI?

223 admin April 23, 2024 [Two Factor Authentication \(2FA \)](#) 4093

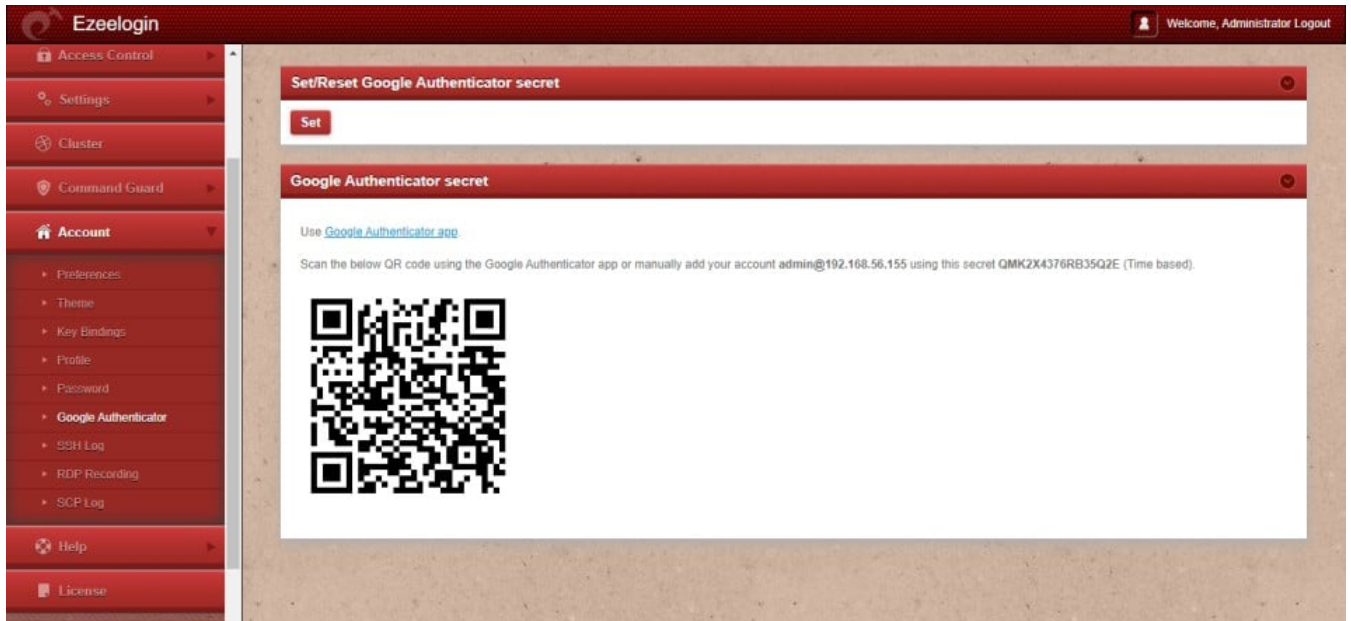

Set or reset Google 2Factor Authentication for the web panel or the ssh shell.

The QR code generation feature is currently affected by the deprecation of the Google Image Charts API, which ceased operation on March 14, 2024. To address this, kindly [update](#) to Ezeelogin version 7.37.5 .

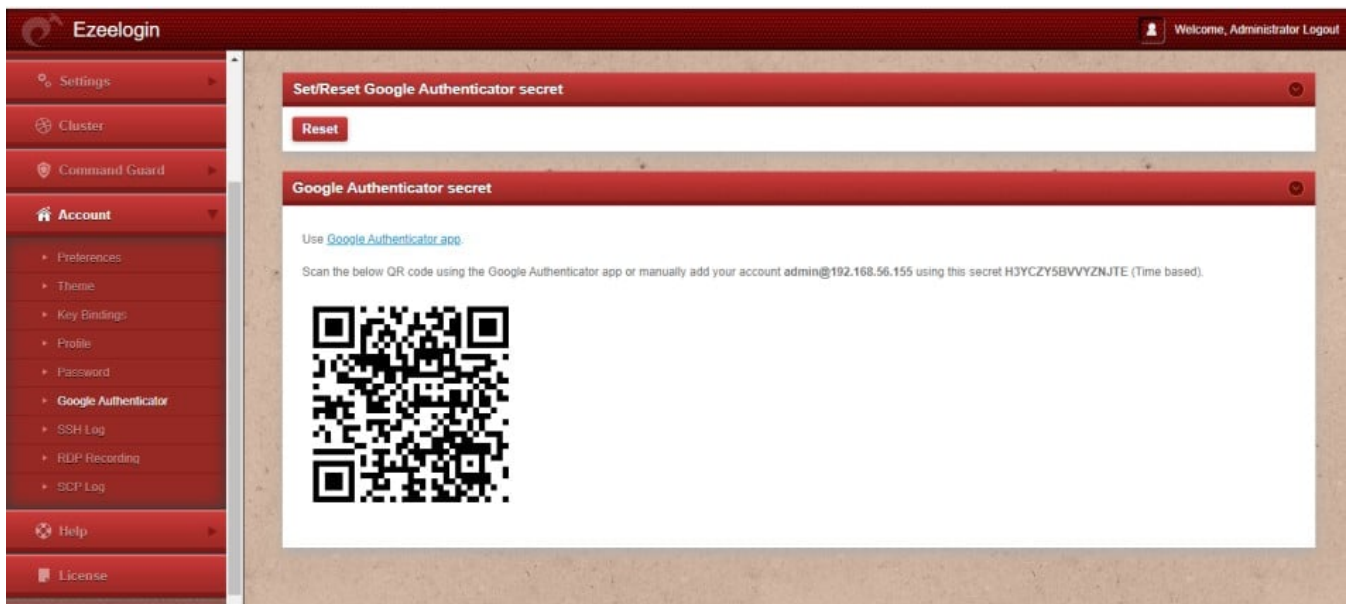

Users can log in to the web interface and go to Account->**Google Authenticator**->set

2.Click on the Set button, the QR code will be visible.

3. To reset it you can do it by Account->**Google Authenticator**->reset. Click on the reset button and the QR code would be visible.
