Your system folder path does not appear to be set correctly. Please open the following file and correct this: index.php : error in ezeelogin webgui.

1. This could be due to insufficient permission for system folder. Give 755 permission to fix this issue.

Give the correct permission by the following command to system folder

```
chmod 755 /var/www/ezlogin/system
```

```
chmod 755 /var/www/ezlogin/cache
```

2. Ensure that you have also provided correct system folder under **`/usr/local/etc/ezlogin/ez.conf`**
