How to add a ssh gateway user in ezeelogin ?

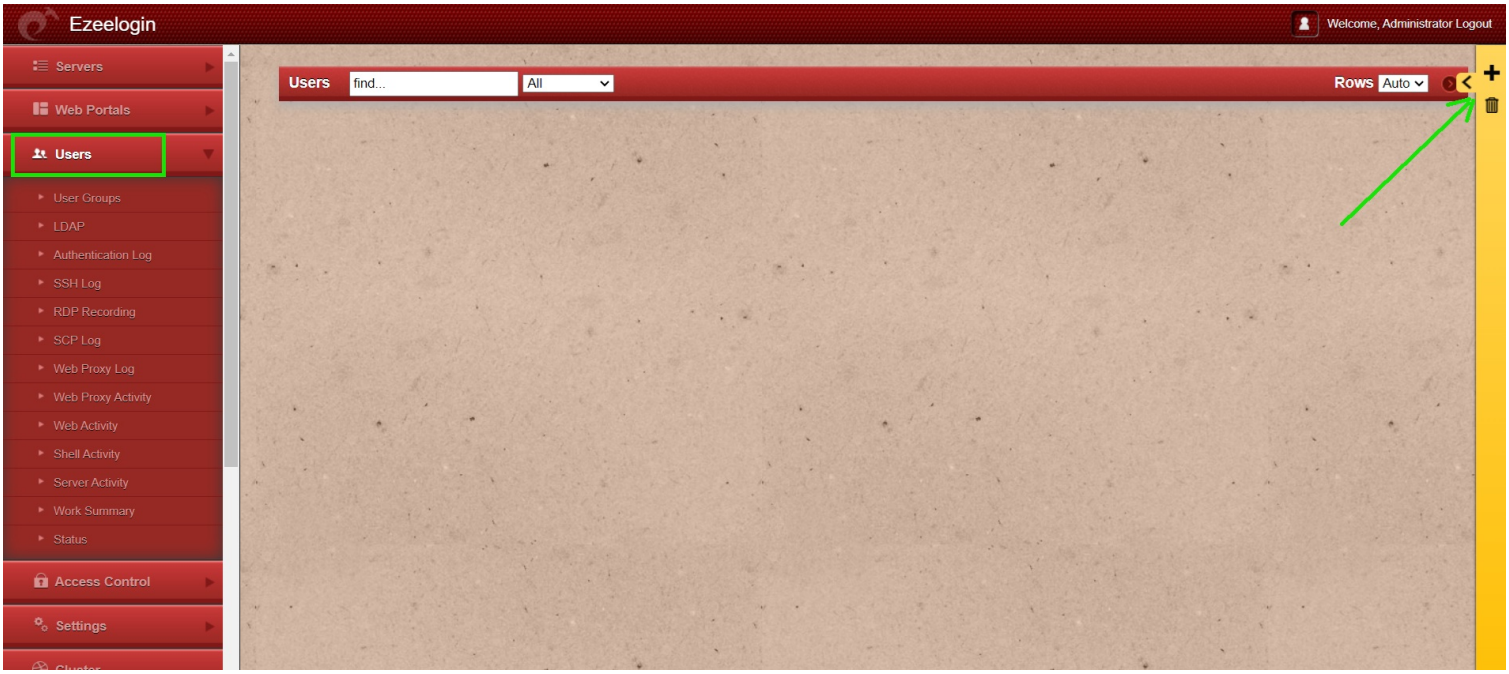

236 Manu Chacko May 27, 2026 Getting Started 13827

Guide for adding an SSH gateway user via Ezeelogin

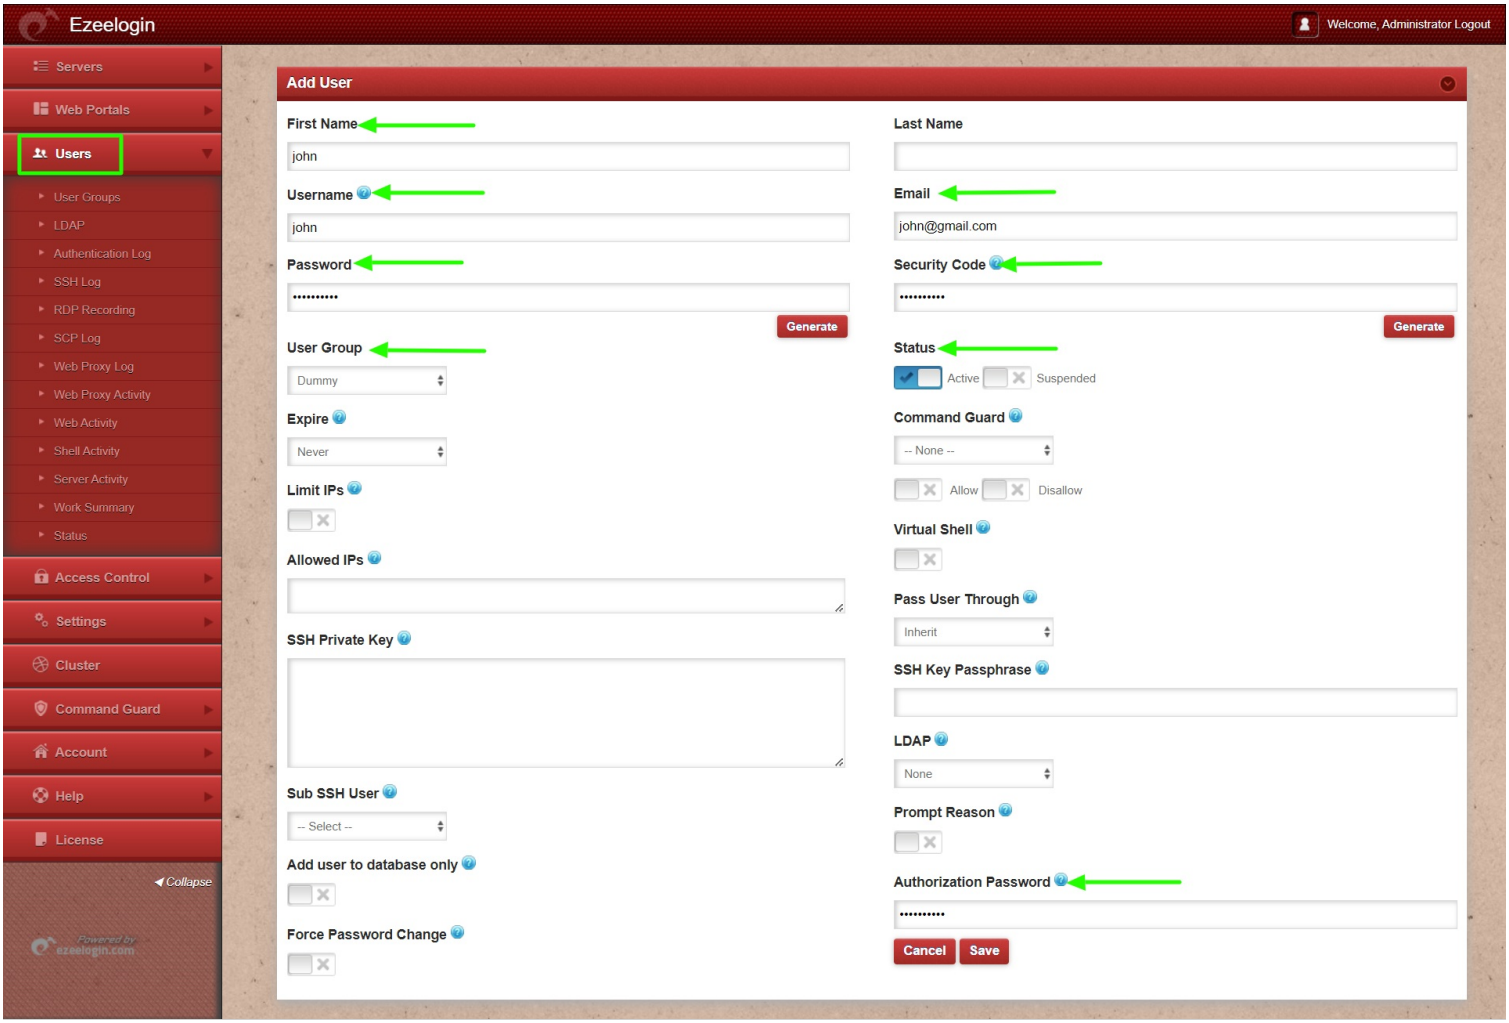

Overview: This article explains how to add a user from your Gateway server web panel.

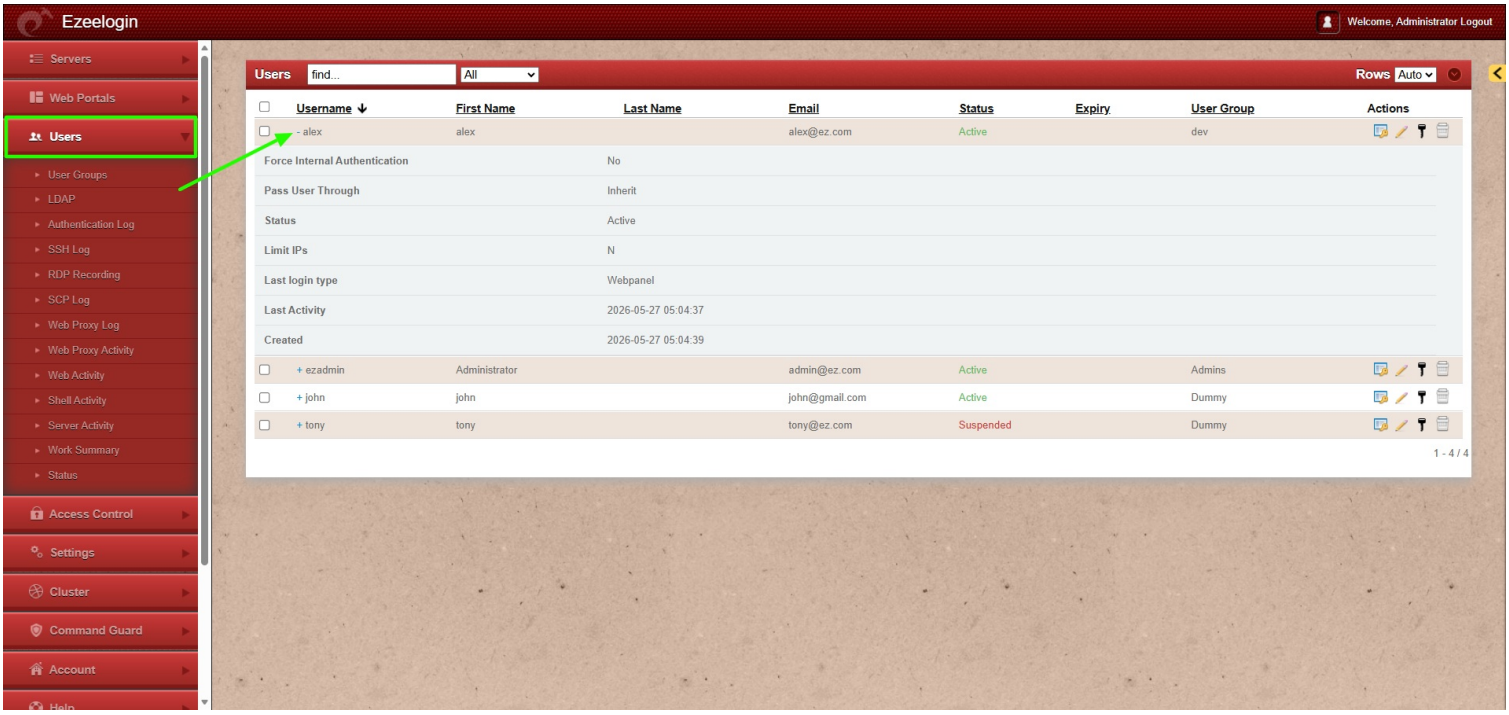

Step 1: Select the **Users** tab from the web GUI and click the Add User (**+ icon**) on the right.

Step 2: Enter the details of the user : **username**, **email**, **password**, **security code**, and other required details to **add the user** , then click save.

Step 3: User details can be viewed from **Users** tab.

Detailed option for viewing user details is available from **Ezeelogin version 7.46.0.** Refer article to **upgrade Ezeelogin to latest version**.
