How to add a ssh gateway user in ezeelogin?

236 Manu Chacko October 12, 2024 Getting Started 11152

Guide for adding an SSH gateway user via Ezeelogin

Overview: This article explains how to add a user from your Gateway server web panel.

Step 1: Select the **Users** tab from the web GUI and click the Add User (+ icon) on the right.

Step 2: Enter the details of the user: user's name, email, security code, password, and other required details to <u>add the user</u>, then click save.

Step 3: You can view the user added in Users tab.
