Set SSH User Expiry

239 admin February 5, 2025 <u>Productivity & Efficiency Features, Security Features, Tweaks & Configuration</u> 11298

How to set the expiry for Ezeelogin SSH gateway users?

Overview: This article describes the feature that lets you manage the duration for which an SSH gateway user will have access to the gateway after expiry. The duration of the SSH access to the gateway can be set to expire in minutes, hours, days, or on a date as shown below. This is useful while granting temporary access to a user.

Step 1: Navigate to **User section -> Edit the user -> set the expiry** and save it.

Refer to the screenshot below to set SSH user expiry:

Ezeelogin			Welcome, Administrator Logout
t≣ Servers ▶	1	Edit User	0
■ Web Portals ►	~	First Name	Last Name
±t Users ▽		mike	k
► User Groups		Username @	Email
► Authentication Log		mike	mike@gmail.com
► SSH Log	1	User Group	Status
► RDP Recording		Admins	Active X Suspended
► SCP Log			Command Guard ©
➤ Web Proxy Log		Expire @	
➤ Web Proxy Activity		on ‡	
Web Activity		2023-03-09 12:06	Allow X Disallow
Shell Activity Server Activity		March 2023	Virtual Shell @
Work Summary		SU MO TU WE TH FR SA 1 2 3 4	- X
Status		5 6 7 8 9 10 11	Pass User Through @
		12 13 14 15 16 17 18	Inherit ‡
Access Control ►		19 20 21 22 23 24 25	
[©] ₀ Settings ▶		26 27 28 29 30 31	SSH Key Passphrase @
	1	Time 12:06	
		Hour	LDAP @
		Minute Now Done	None \$
育 Account ▶		Sub SSH User @	Authorization Password @
		Select \$	Cancel Save
License		Force Password Change @	Cancer Save

Step 2: After the duration of expiry, the user gets expired.

Step 3: You can disable the user's suspension by setting the status of the user as Active as shown below.

Only the **admin-privileged** user would be able to log into the web interface and unsuspend the users (**users** -> **edit** -> **set status to active** -> **enter authorization password**(password of the currently logged in user) -> **save**). Note that this is possible for admin-privileged users and not for any other user.
