

License expired though its not time / Number of servers exceeds maximum limit / How to flush license

25 admin November 21, 2024 [License](#) 14511

How do you resolve an expired license issue?

Overview: This article explains how to address issues related to an expired Ezeelogin license, including verifying IP addresses and server limits, and reloading the license to ensure proper functionality.

1. Error: License Expired!

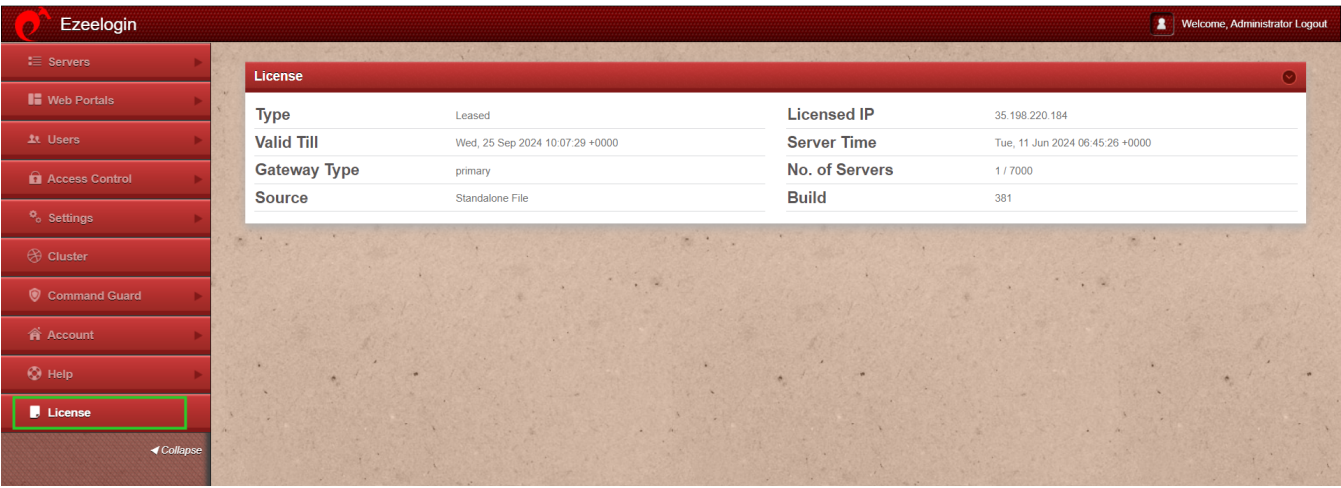

Step 1(A): Run the below command to find the public IP of the gateway server.

```
root@gateway:~# wget -qO- https://ezeelogin.com/myip
```

Step 1(B): Refer to the articles below to change the licensed IP from the billing portals.

- [Update the licensed IP from the new billing portal.](#)
- [Update the licensed IP from the old billing portal.](#)

Step 1(C): Relogin to Ezeelogin software GUI and click on the license tab to update the license. Refer to the screenshot below.

2. Error: The number of servers exceeds the maximum limit.

Step 2(A): Login to your [billing portal](#) and under the license tab > check whether the licensed number of servers is correct.

Licenses

171.49.170.206 Advanced search Options

#	IP	Secondary IP	Servers	Expiry	Status	Order ID	Customer ID	Build ID	Unbilled	Created	Modified	Actions
1	171.49.170.206	171.49.170.206	30							2019-10-12	2022-11-30	

Step 2(B): Also, clear the browser cache and try to re-login to Ezeelogin web GUI and re-add the server.

3. How to flush/refresh the license for Ezeelogin Version 6 & 7

Step 3(A): Click on the license tab from the Ezeelogin software GUI to reload the license from the license server. This will help you automatically fetch the updated license from your billing portal that you have updated.

Servers Web Portals Users Access Control Settings Cluster Command Guard Account Help **License**

License

Type	Leased	Licensed IP	35.198.220.184
Valid Till	Wed, 25 Sep 2024 10:07:29 +0000	Server Time	Tue, 11 Jun 2024 06:45:26 +0000
Gateway Type	primary	No. of Servers	1 / 7000
Source	Standalone File	Build	381

Step 3(B): If the issue persists ensure the following things that are mentioned below:

Step 3B(i): Ensure the HTTPS traffic to **license.ezeelogin.com** is not blocked in your firewall. To check, run the below commands.

```
root@gateway:~# telnet license.ezeelogin.com 443
root@gateway:~# telnet license2.ezeelogin.com 443
```

OR

```
root@gateway:~# wget https://license.ezeelogin.com
root@gateway:~# wget https://license2.ezeelogin.com
```

Step 3B(ii): Additionally, ensure that **allow_url_fopen** is **enabled** in your PHP configuration.

```
root@gateway:~# php -i|grep fopen
```

```
allow_url_fopen => On => On
```
