License expired though its not time / Number of servers exceeds maximum limit / How to flush license

25 admin November 21, 2024 License 14866

How do you resolve an expired license issue?

Overview: This article explains how to address issues related to an expired Ezeelogin license, including verifying IP addresses and server limits, and reloading the license to ensure proper functionality.

1. Error: License Expired! License expired

Step 1(A): Run the below command to find the public IP of the gateway server.

```
root@gateway:~# wget -qO- https://ezeelogin.com/myip
```

Step 1(B): Refer to the articles below to change the licensed IP from the billing portals.

Update the licensed IP from the new billing portal.

Update the licensed IP from the old billing portal.

Step 1(C): Relogin to Ezeelogin software GUI and click on the license tab to update the license. Refer to the screenshot below.

Step 2(B): Also, clear the browser cache and try to re-login to Ezeelogin web GUI and re-add the server.

3. How to flush/refresh the license for Ezeelogin Version 6 & 7

Step 3(A): Click on the license tab from the Ezeelogin software GUI to reload the license from the license server. This will help you automatically fetch the updated license from your billing portal that you have updated.

Step 3(B): If the issue persists ensure the following things that are mentioned below:

Step 3B(i): Ensure the HTTPS traffic to **license.ezeelogin.com** is not blocked in your firewall. To check, run the below commands.

```
root@gateway:~# telnet license.ezeelogin.com 443
root@gateway:~# telnet license2.ezeelogin.com 443
```

OR

root@gateway:~# wget https://license.ezeelogin.com

root@gateway:~# wget https://license2.ezeelogin.com

Step 3B(ii): Additionally, ensure that allow_url_fopen is enabled in your PHP configuration.
