Connect jumpserver using PuTTY

Connecting to a Remote Server Managed by Ezeelogin Using PuTTY.

Overview: This article describes how to connect to a remote server managed by Ezeelogin using PuTTY.

Step 1: Open PuTTY and enter the **Ezeelogin/Jumpserver IP or Hostname** along with the **Port number**. Click "**Open**" to initiate the connection.
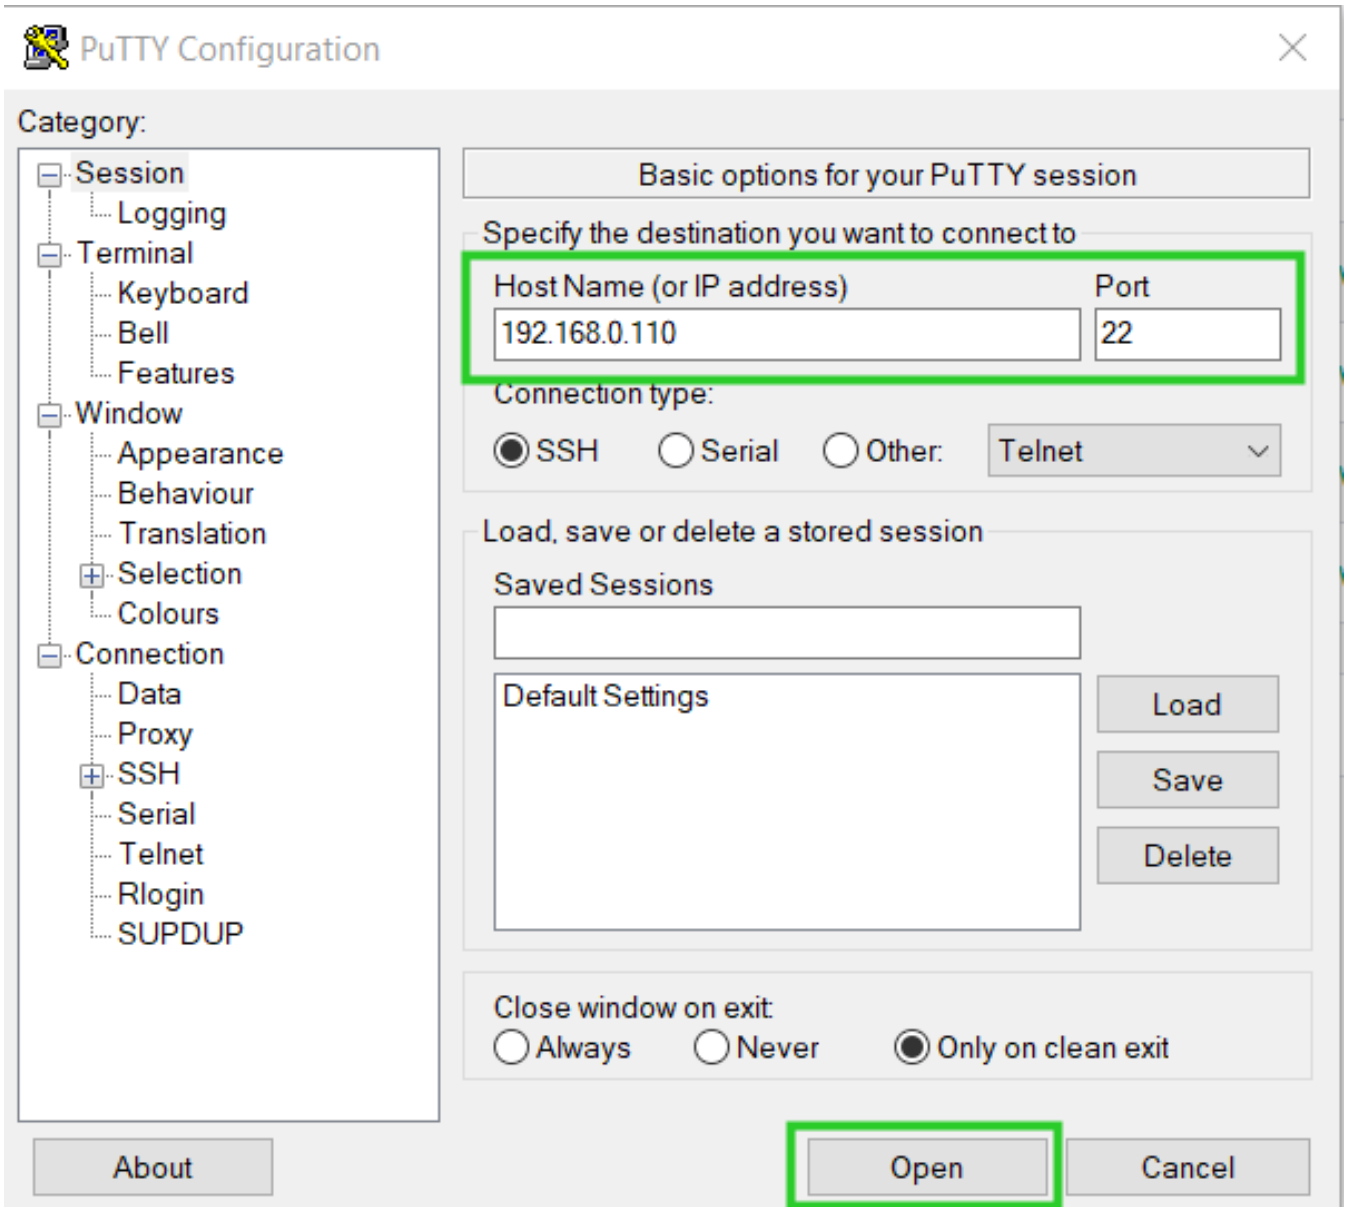

**Step 2**: Provide your Ezeelogin **username and password** when prompted.

Step 3: If enabled, **enter the Security code or complete Two Factor Authentication** to access the Ezeelogin shell (ezsh).

Step 4: Upon successful authentication, you will enter the Ezeelogin shell (ezsh). The initial screen displays a **list of server groups**. Navigate through the list using **arrow keys** and **press Enter to select a**
server.
Step 5: Use the **Tab key** to view detailed information about the selected server (refer to the screenshot for guidance).

Step 6: You can also **press ' | '** from the **server group lists/server lists** to know the details of Ezeelogin.

Step 7: Select and press enter to log into any server and you will be logged into a remote server via Ezeelogin.
