

Cannot login to ezeelogin backend - CageFS-Cloudlinux

29 admin July 4, 2018 [Common Errors & Troubleshooting](#) 4887

Unable to login via ssh into ezeelogin shell on cloudlinux server with Cagefs Enabled.

Error: "/usr/local/bin/ezsh: No such file or directory"

With CageFS (CloudLinux) enabled, you might want to exclude ssh gateway users.
Add the username to file:

/etc/cagefs/exclude/systemuserlist and restart cagefs.
