## LICENSE ERROR: Could not resolve host: license.ezeelogin.com (after migrating a standalone license)

---

**Overview:** This article addresses the Could not resolve host: license.ezeelogin.com error encountered in the Ezeelogin GUI after migrating a standalone license. Ensure the lic.dat file is present in the /usr/local/etc/ezlogin/ folder. Check the file with ls -al /usr/local/etc/ezlogin/\*.dat and copy it from the old server using scp.

---

If you are getting the above error on the [license tab of Ezeelogin GUI](#) after migrating the standalone license, make sure that there is **lic.dat** file in the **/usr/local/etc/ezlogin/** folder.

To check if the file is there:

```
root@new-gateway:# ls -al /usr/local/etc/ezlogin/*.dat
```

Follow the step to copy the license file from the old server to new

```
root@old-gateway:# scp /usr/local/etc/ezlogin/lic.dat root@new-gateway-ip:/usr/local/etc/ezlogin/lic.dat
```

---
