How to add InterWorx as webportal in Ezeelogin?

Overview: This article explains how to integrate InterWorx as a web portal in Ezeelogin. It details the system requirements, supported operating systems, and VPS systems. The article includes steps for installing InterWorx, obtaining a trial license, and activating the license. Finally, it provides instructions on adding InterWorx to the Ezeelogin web portal and managing autologin settings.

Minimum System Requirement
Processor: 1.1 GHz
Disk Space: 20 GB minimum; 40 GB recommended
Memory: 1 GB minimum RAM with 3 GB minimum swap
If the system has more than 1 GB RAM, the RAM to swap ratio should be as follows:
2 GB RAM should have at least 4 GB swap
4 GB - 8 GB RAM should have the same amount of swap as RAM
If more than 8 GB of RAM, there should be at least a 4 GB swap

Supported OS
RedHat Enterprise Linux 6.x, 7.x 64 bit Architecture
CentOS 6.x, 7.x 64 bit Architecture

Supported VPS Systems
Virtuozzo
Xen
OpenVZ
VMware

⚠️ **Install Interwox in your fresh server, so that the activation failed error can be solved.**

Contact Interworx support and ask them for a trial license:- https://support.interworx.com/?login=1

To Install Interworx 7:

Step 1. Log in to the server at the command line as root

Step 2. Download and run the installer :

```
root@centos ~]# sh <((curl -sL updates.interworx.com/interworx/7/install.sh))
```

To Install Interworx 6 :

Step 1. Log in to the server at the command line as root

Step 2. Download and run the installer :

```
root@centos ~]# sh <((curl -sL interworx.com/inst.sh))
```

Activate the Interworx license either from a web browser or the command line.

Step 1. From the browser, go to **https://server_ip]:2443/nodeworx**. Follow the prompts of email, password, and license key for the control panel.

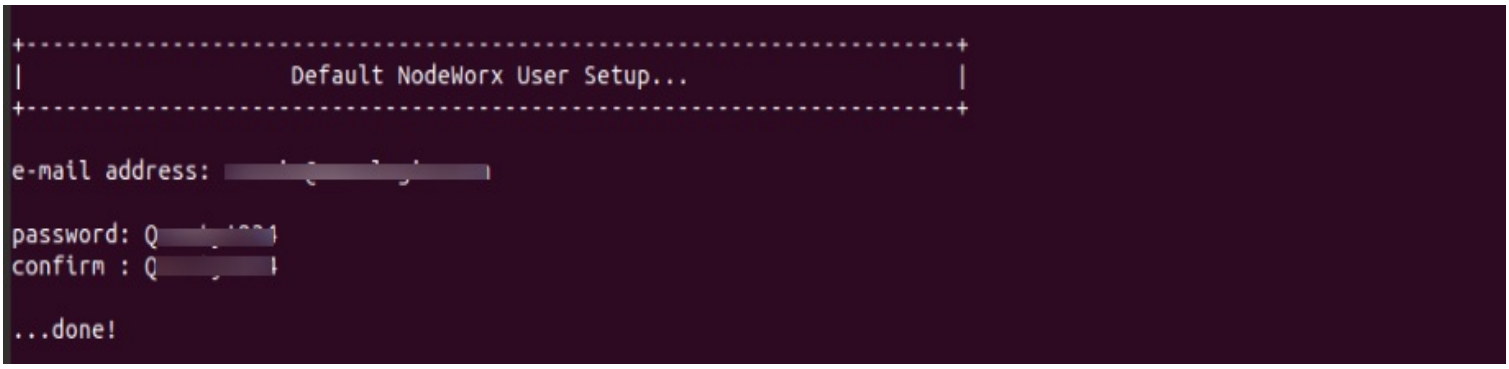

Step 2. From the command line

```
root@centos  ~]#  cd /usr/local/interworx/bin

root@centos  bin]# ./goiworx.pex
```

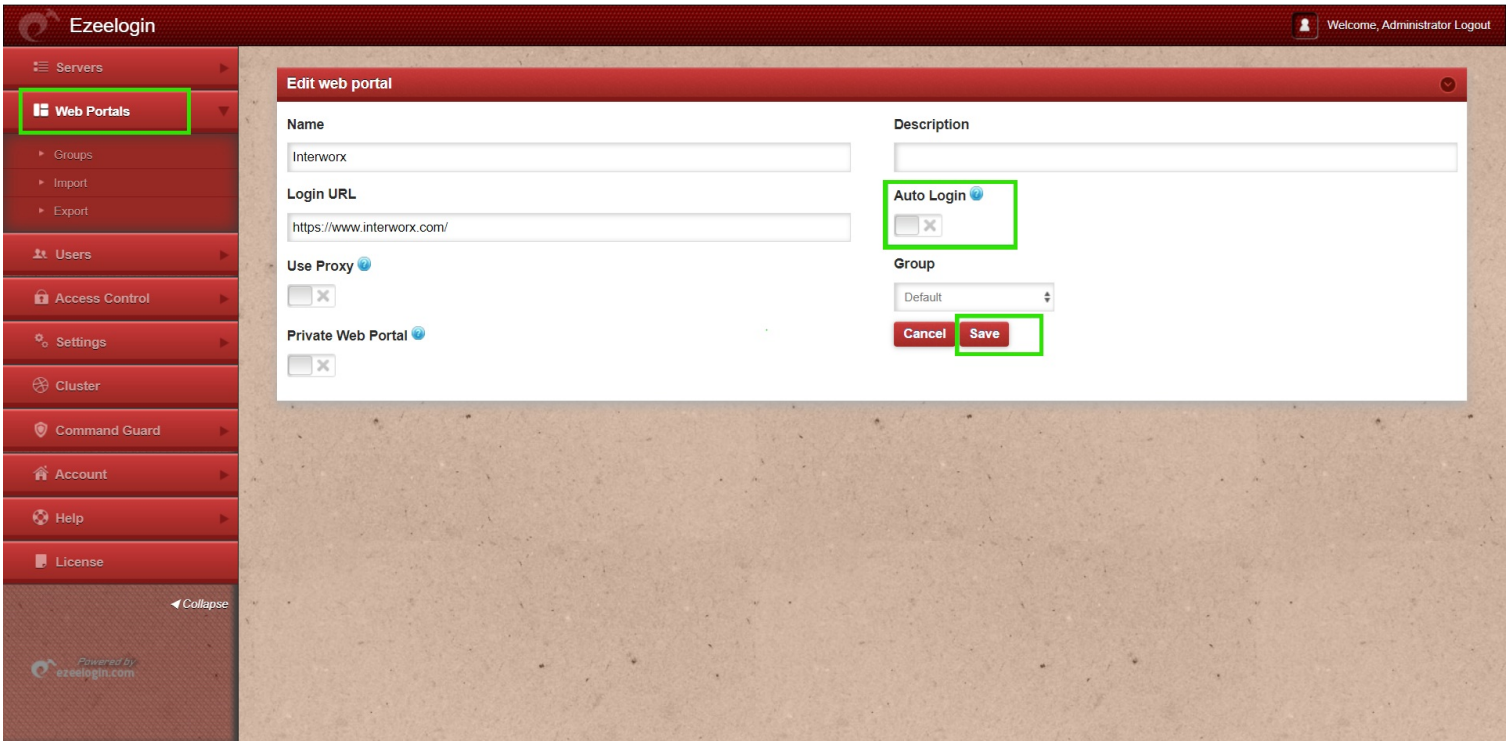

When prompted enter your email and password for the administrator account for the InterWorx control panel.

Once the scripts log in to NodeWorx through the web browser **https://server_ip:2443/nodeworx** and log in using the email and password used in the previous step.

Login to **Ezeelogin GUI** -> Click on **Web Portals** tab -> **Add new Web Portal** with **Auto Login enabled**. Refer below example to add InterWorx.

To disable autologin, edit the web portal and uncheck the autologin option. Refer to the screenshot below:

To **troubleshoot** issues related to the web portal, refer to Step 4 in the article linked below:
