Enabling and configuring email notifications in ezeelogin

Overview: This article covers configuring email notifications in Ezeelogin. It includes adding a valid email address for the super admin, updating the notification sender's address and name, and ensuring a mail server is installed. It also provides steps to enable failed login, change, and shell access notifications in the Ezeelogin Jump Host settings.

Edit the super admin user and add a valid email address to receive the notifications. Refer below screenshot.

To change from address and name navigate to **Settings -> General -> Miscellaneous -> Notification From Name / Notification From Email**

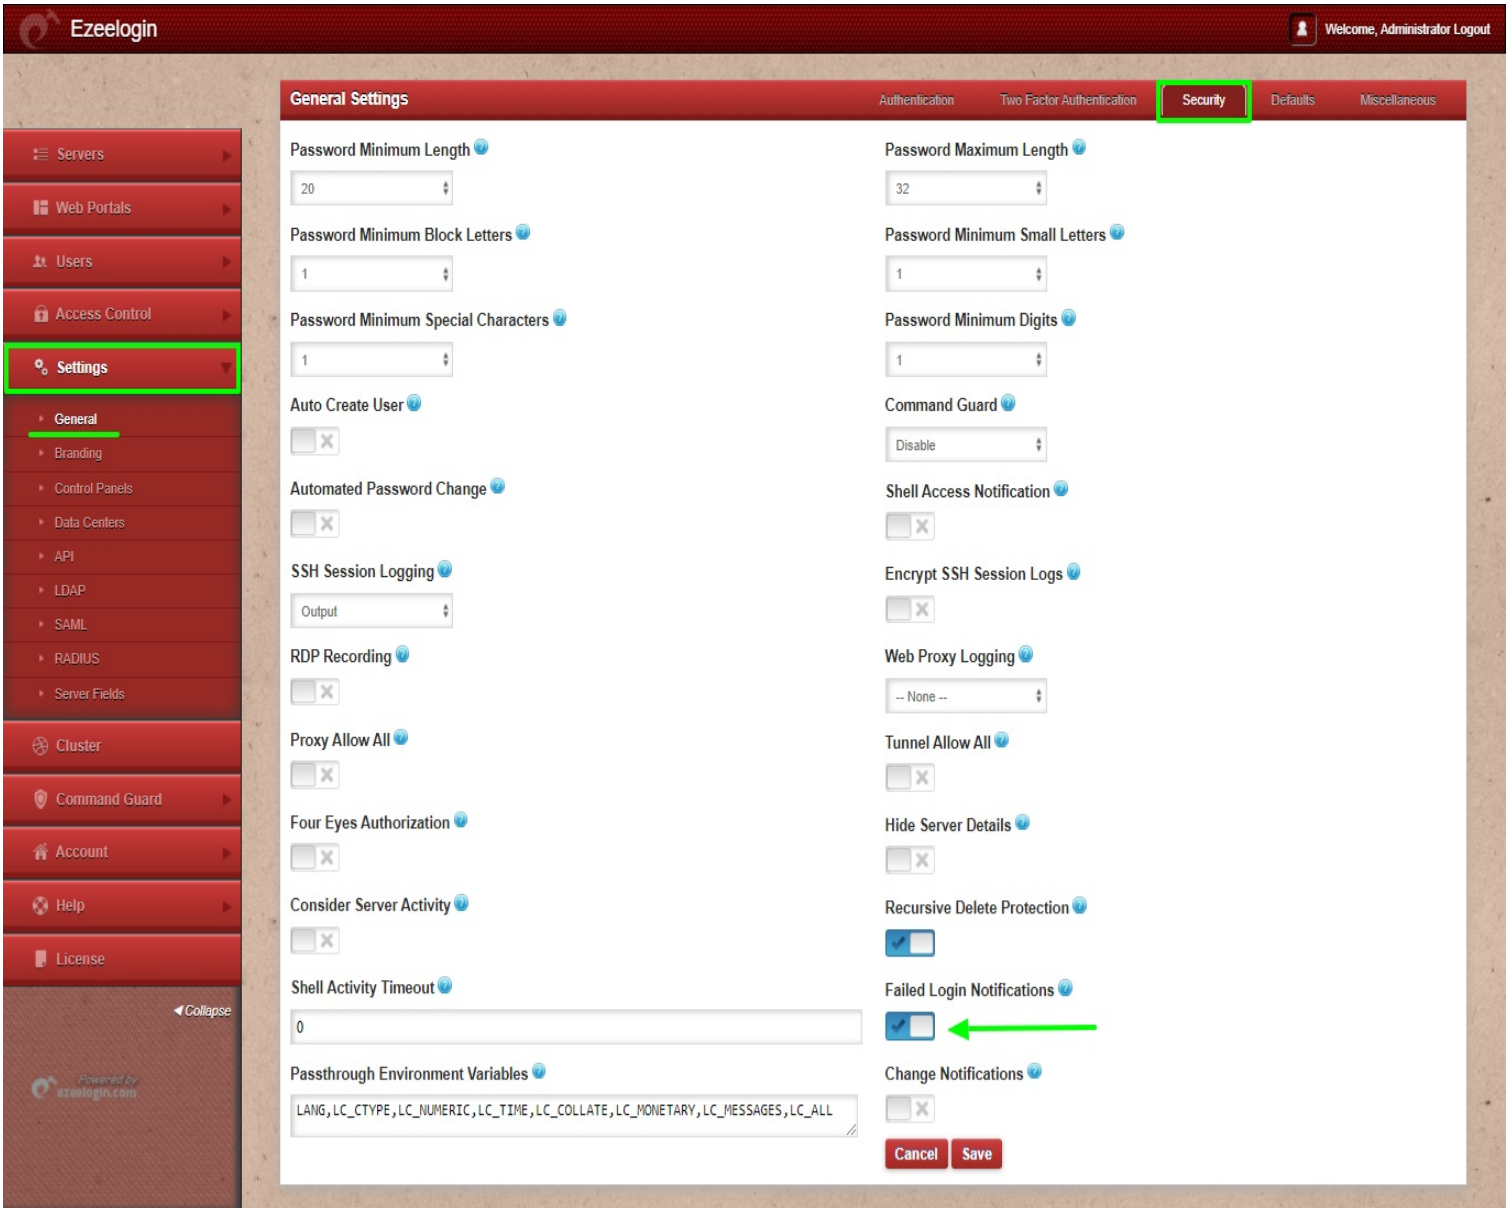

Make sure you have installed a mail server on your server. Refer below article to install Sendmail on the gateway server.

Configure SMTP on Ezeelogin Jump server

Step 1. How to enable failed login mail notification in Ezeelogin Jump Host?

Failed login notification -- Send mail notification to super admin user for failed login in Ezeelogin GUI.

You can enable notification in **Settings -> General -> Security -> Failed Login Notification**

Step 2. How to enable change notification in Ezeelogin Jump Host?

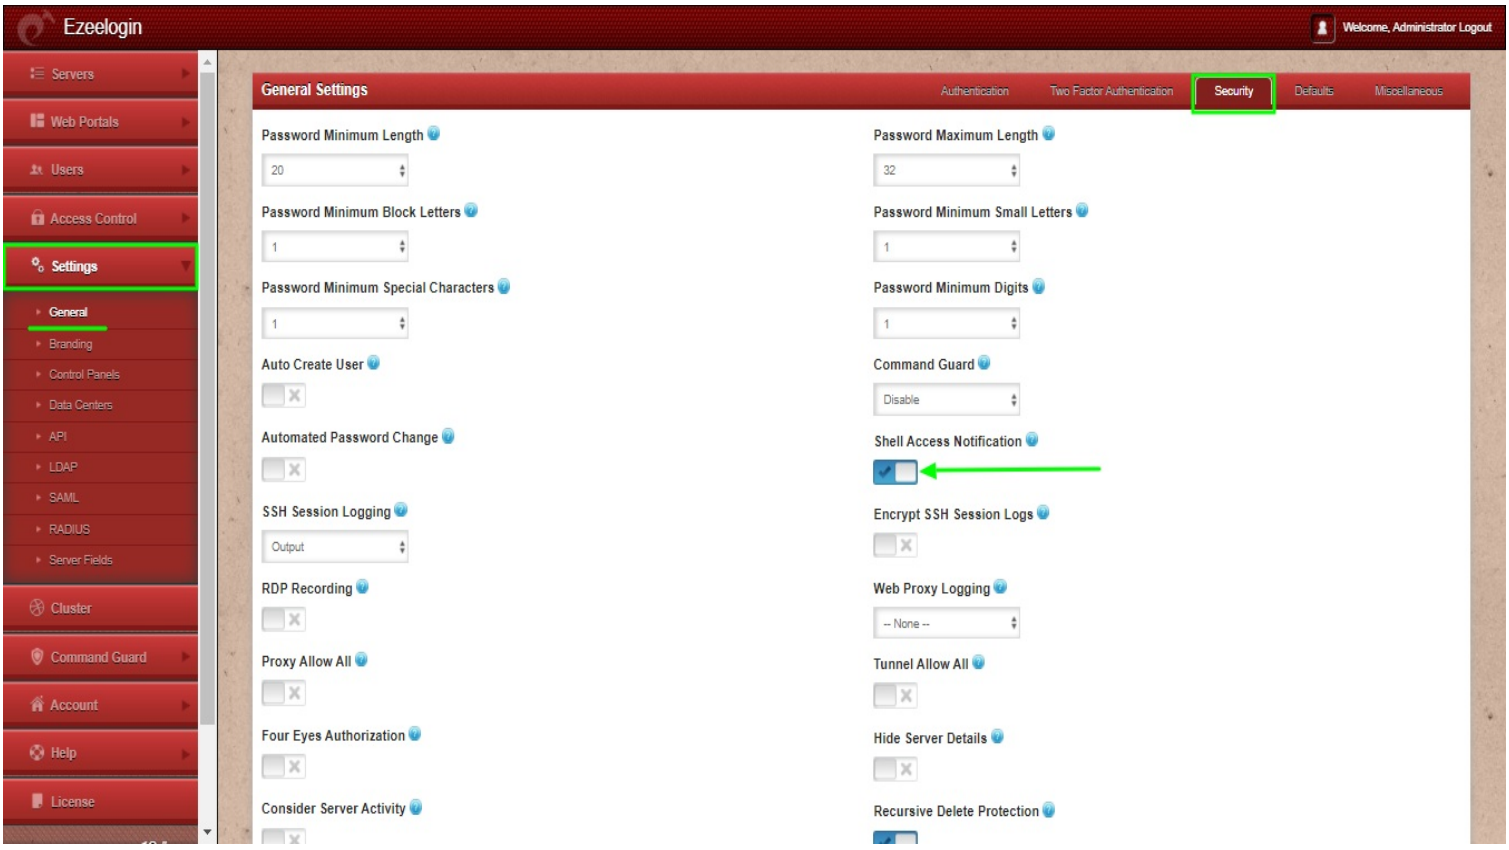

Change Notification -- Send mail notification to super admin user when important changes are done on Ezeelogin GUI.

You can enable notification in **Settings -> General -> Security -> Change Notification**

Step 3. How to enable shell access notification in Ezeelogin Jump Host?

Shell access notification -- Send mail to super admin user when a user login to Ezeelogin shell (ezsh).

You can enable notification in **Settings -> General -> Security -> Shell Access Notification**
