LDAP Configuration Errors: Could not bind to any LDAP server: error:14090086:SSL routines:ssl3_get_server_certificate:certificate verify failed (self signed certificate in certificate chain)

Overview: This Article Addresses An LDAP Configuration Error:The error message "Could Not Bind To Any LDAP Server: Error:14090086
Routines:ssl3_get_server_certificate Verify Failed (Self Signed Certificate In Certificate Chain)" occurs due to a self-signed certificate verification failure. To resolve this issue, configure the LDAP settings in Ezeelogin's GUI and update the necessary configuration files to bypass certificate verification. For a permanent fix, replace the self-signed certificate with a valid CA, CERT, and KEY.

If you are getting the above error when you configured ldap from ezeelogin gui >settings >ldap, Try the following steps

Step 1. Add the following to /etc/ldap/ldap.conf on client machine (ezeelogin installed server)

```
TLS_REQCERT never
```

Step 2. Add the following to /etc/sssd/sssd.conf

```
ldap_tls_reqcert = never
```

Step 3. This error occurs while ceritificate verifications fails as you are using a self signed certificate. Putting a valid CA,CERT and KEY will fix the issue.
