How to resolve the 'No Two-factor Authentication enabled' error encountered while logging into the Ezeelogin GUI?

Overview: This article assists Ezeelogin admin privileged users in resolving the "**No Two-factor Authentication enabled**" error encountered while logging into the Ezeelogin GUI, which is caused by enforcing Force Two-Factor authentication without enabling any [Two-Factor authentication](#) methods.
This error happens when we enforce Two-Factor authentication without enabling any of the Two-Factor authentications.

Step 1: Run the following command to disable Force Two Factor Authentication.

```
root@jumpserver:~#  php /usr/local/ezlogin/ez_queryrunner.php
"update prefix_settings SET value = 0 WHERE name =
'two_factor_auth'"

Or

root@jumpserver:~# php
/usr/local/ezlogin/ez_queryrunner.php   "update
```

```
prefix_usergroups SET force_tfa = 'N'"
```

Step 2: Re-enable **Force Two-Factor Authentication** and any of the **Two-factor Authentication method** which was used before. Login to Ezeelogin GUI and navigate to **Settings -> General -> Two-Factor Authentication**
