1. What is web session timeout?

It is an event occurring during an interval when a user does not perform any action.

2. How to set/enable session timeout in Ezeelogin Web Interface?

Login to Ezeelogin gateway machine/Server > Modify/Add the timeout values in ezeelogin conf file.

3. To modify the timeout values in the config file for the web interface, edit the [ez.conf](#) config file :

/usr/local/etc/ezlogin/ez.conf file and set the variable in seconds.

cookie_expiration 3600

(3600 seconds = 60 min)

```
GNU nano 2.9.3 /usr/local/etc/ezlogin/ez.conf Modified
cver 2
system_folder /var/www/ezlogin/
www_folder /var/www/html/ezlogin/
uri_path /ezlogin/
force_https no
db_host localhost
db_port /var/run/mysqld/mysqld.sock
db_name ezlogin_aihx
db_user ezlogin_xmfrob
db_pass
db_prefix yuqj_
cookie_encryption_key
cookie_name uqmq
cookie_path /ezlogin/
admin_user admin
mysql_encrypt no
cookie_expiration 3600
```

ezsh 7.25.4

The config file for Ezeelogin Version 5 would be /usr/local/etc/ezeelogin.conf
