How to delete all users in Ezeelogin?

Overview: This article describes how to delete all users in Ezeelogin by adjusting the user display to 100 rows, selecting all users, and clicking delete, with additional steps if the super admin user cannot be removed.

Caution: The following steps will delete all the Ezeelogin Users that have been created.

1. Change the number of [users](#) listed in Ezeelogin to maximum by selecting the Rows to 100.

2. Select all users in Ezeelogin and click on the delete button to remove the users.

The screenshot shows the Ezeelogin web interface. On the left is a sidebar menu with options: Servers, Web Portals, Users (highlighted with a green box), User Groups, LDAP, SSH Log, RDP Recording, SCP Log, Web Proxy Log, and Web Proxy Activity. The main content area has a red header bar with the text 'Delete' and a back arrow. Below this is a confirmation message: 'Confirm delete selected item(s)?' with 'Yes' and 'No' buttons. A green arrow points to the 'Yes' button. Below the confirmation is a table of users. The table has columns: Username, First Name, Last Name, Email, Status, Expiry, User Group, and Actions. The table contains four rows of user data. A green arrow points to the 'Users' header of the table. On the right side of the table, there is a yellow sidebar with a plus sign and a trash icon, with a green arrow pointing to the trash icon.

Username	First Name	Last Name	Email	Status	Expiry	User Group	Actions
Aron	Aron		Aron@itfactory.com	Active		Admins	[Edit] [Delete]
Catherine	Catherine		Catherine@doodle.com	Suspended		Dummy	[Edit] [Delete]
Celin	Celin		Celin@cater.co	Active		Admins	[Edit] [Delete]
Irin	Irin		irin@fon.co	Active		Dummy	[Edit] [Delete]

Note: If you get an "Error: Cannot delete the super admin user" click again on the delete button and the admin user will be unselected from the list of deleting users.
