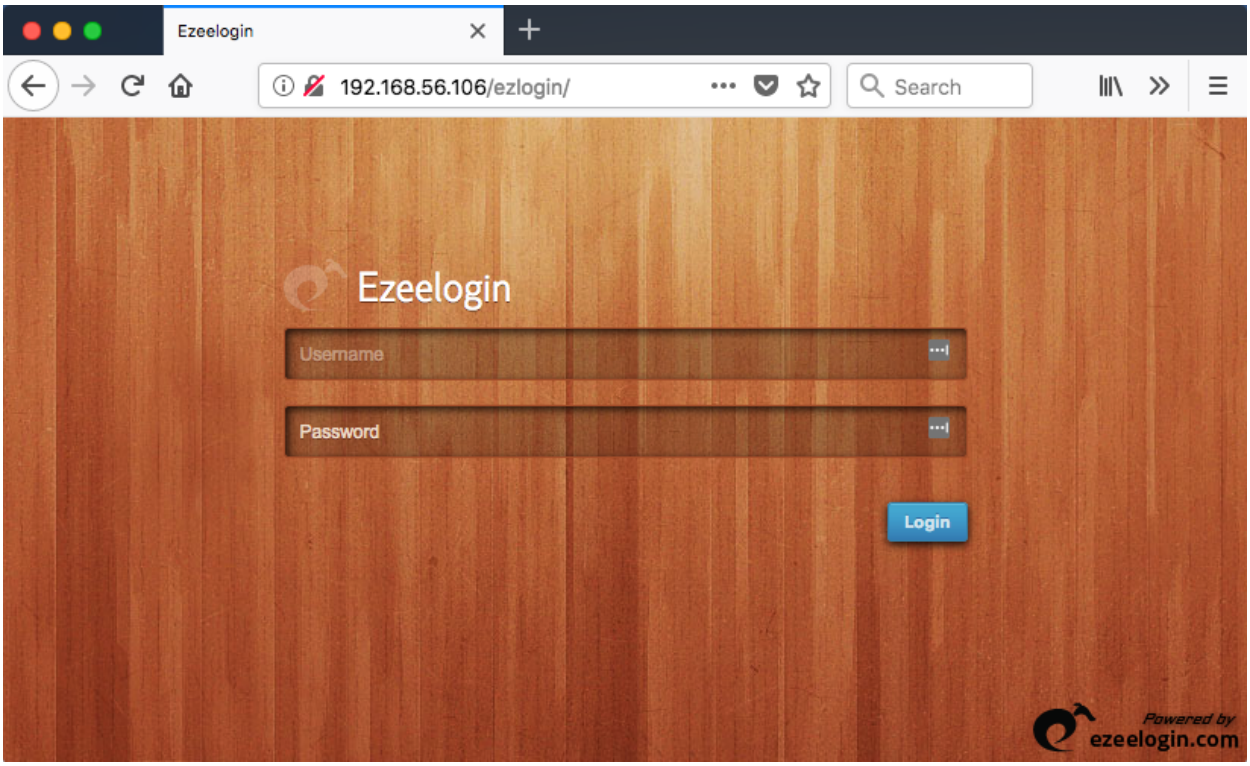
Getting Started with Ezeelogin Jump Server

394 Vishnupriya May 26, 2021 General 1763

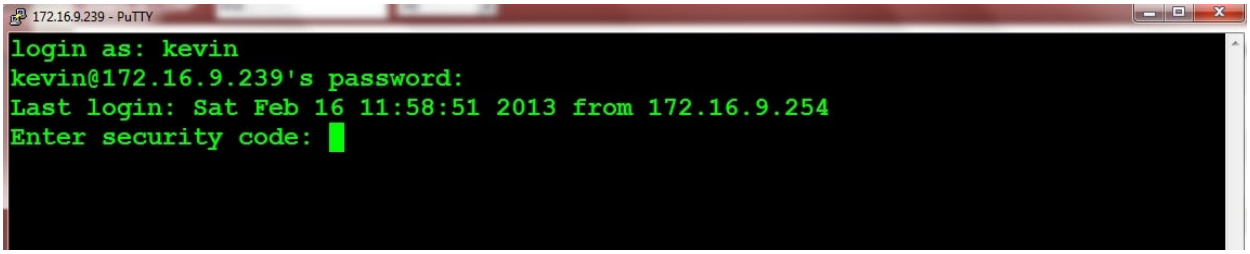
1.Ezeelogin GUI/ Web interface Login

- Go to the Ezeelogin web panel installed URL (configured during install) using your web browser. Use the admin username and password that you provided during Ezeelogin installation to login to the Ezeelogin web panel



2. Ezeelogin backend shell (Ezsh shell)

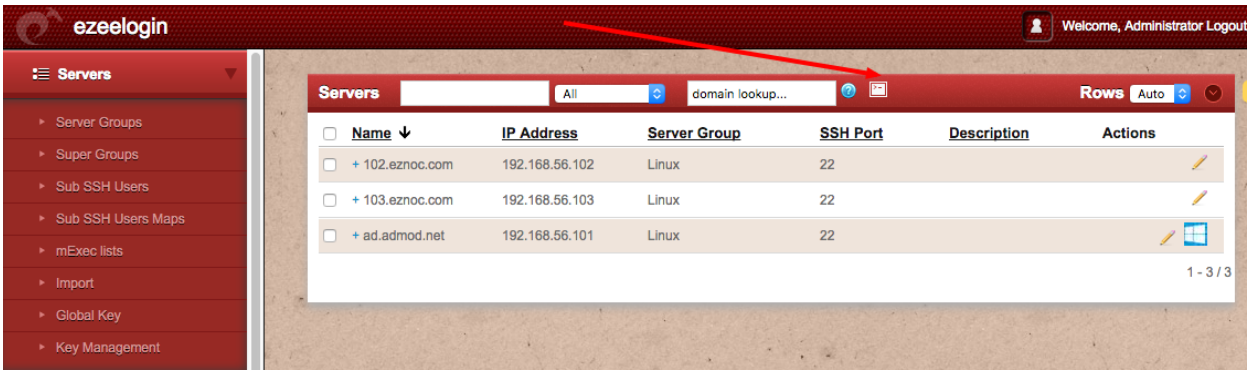
- You need to SSH into the Ezeelogin ssh gateway server as any Gateway user that was created.



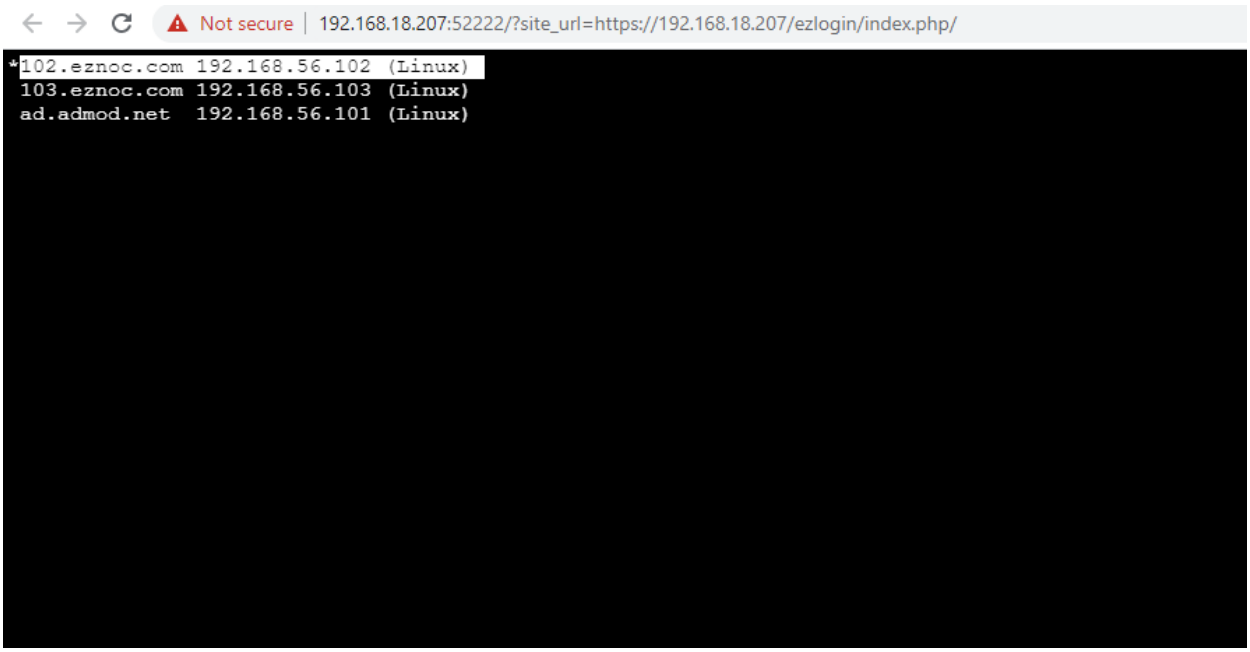
3. Web SSH Console

Click on the webssh icon as shown below and you will be able to SSH via browser.

> [How to setup web ssh console in ezeelogin and ssh via browser]



A new browser tab would be opened to SSH via the browser itself.



[How to add a remote Linux device into the ssh jump server ?]

[How to add a ssh jump server user in ssh jump server?]

[How to record ssh sessions of ssh jump users ?]

[How to execute commands on multiple linux server in ssh using parallel shell?]

How to configure Yubikey two factor authentication in ssh jump server ?

How to configure google 2FA (Two factor Authentication) in ssh jump server ?

Configure DUO 2FA in Ezeelogin SSH jump server

How to add a windows host into the ssh jump server?

How to view RDP Session Recordings?

How to integrate with LDAP (Windows AD or OpenLdap)?
