How to View Remote User Passwords with Ezeelogin GUI and ezsh Shell?

Overview: This article describes how to view remote user passwords for servers using the web GUI or ezsh shell, provided admin privileges are granted.

Suppose you have not given/granted the privilege to an ezeelogin user(eg: "tom").

Then Navigate to Access Control > under User-server > enable View Server Details for the user ("tom") and Save it.

Ezeelogin		Welcome, Administrator Logout
t≣ Servers	Control the access of a user to specific actions	
Web Portals	User	
요 Users	tom +	
Access Control	Actions Expand all - Collarse all - Select all - Toggle selection	
UserGroup-ServerGroup	🕈 🗹 🗅 Gateway (aka Bastion Host)	
 User-ServerGroup User-Server 	→ ✓ C Add Server

Super Groups + Alphaserver 192.168.0.111 CollectiveTech 22	/ 🗔 🗔 📀

Step 3: Navigate to any server("CosmosNetServers") using the up and down arrow keys
> Click on the tab key to view server details.

	erver details		
Name	: CosmosNetServers		
IP	: 192.168.0.105		
SSH port	: 22		
SSH User	: root		
Password	: • • • • • • • • • • • • • • • • • • •		
Group	: CollectiveTech		
	ess any key to continue]		
SERVERS [A1]	servers] (group) [Normal /] (User: admin)		
Start typing	servers] (group) [Normal /] {User: admin} name to locate. ESC: Clear search, F1/+: Help, F4/!: Exit.		
State opping name to rotate. ESC. Creat Staten, Fr/T. Nerp, F1/T. Exte.			

Menu ssh://admin@127.0.0.1:22 SSH CONNECTION ESTABLISHED

By following the above steps any ezeelogin user can view the server details.

This option will be effective only if the admin user has granted the privilege to view passwords for gateway users through access control.

Refer to manual details for more information:

- Explanation of server list from the backend
- The user would need access to 'view server details' in the access control
- Ezeelogin shell shortcuts
- Internal commands to view server details, list the servers, and copy from ezsh

Contact our support department if you face any difficulties.
