

Disable SAML /SSO Authentication on ezeelogin

416 Manu Chacko August 1, 2024 [Features & Functionalities](#) 2860

Switching ezeelogin authentication from SAML/SSO to internal

Overview: This article explains how to disable SAML/SSO authentication in Ezeelogin. Run the command `/usr/local/ezlogin/ez_queryrunner.php "update prefix_settings set value='internal' where name='web_auth';"` to disable SAML/SSO. Alternatively, you can allow internal authentication without disabling SAML by enabling "Allow Internal Authentication" under Settings >> Saml >> Advanced option. This will provide an internal auth URL for local users to log in without SAML authentication.

Run this command to disable SAML/ SSO Authentication.

```
/usr/local/ezlogin/ez_queryrunner.php "update prefix_settings set value='internal' where name='web_auth';"
```

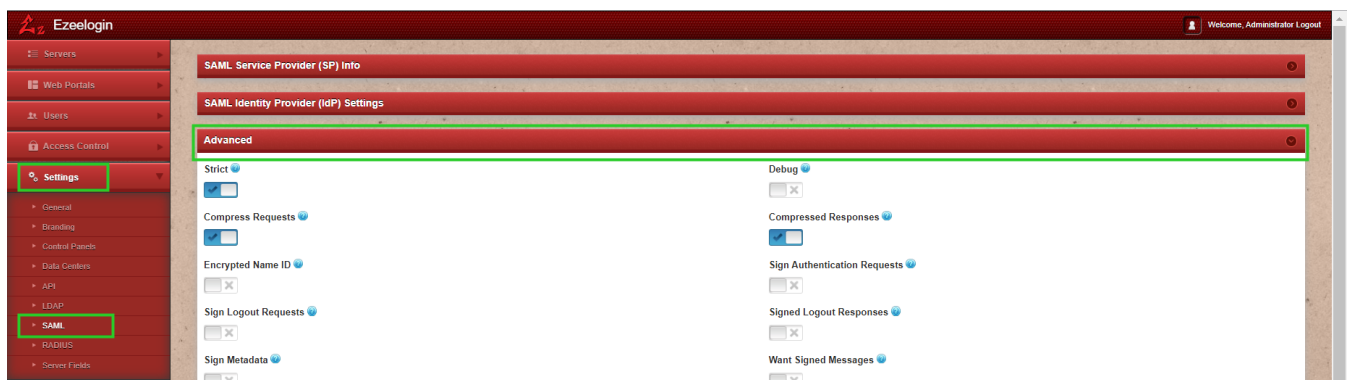

Alternative Method:

This is an alternative method where you can log in without saml authentication.

(**Note:** We are not disabling the Saml here instead users can login without Saml with the provided url.)

Under Settings -> Saml -> Advanced option -> Enable Allow Internal Authentication.

You will receive an internal auth URL from which you can log in without Saml authentication for local users.
