3. Command Guard

Commands > index : Commands list

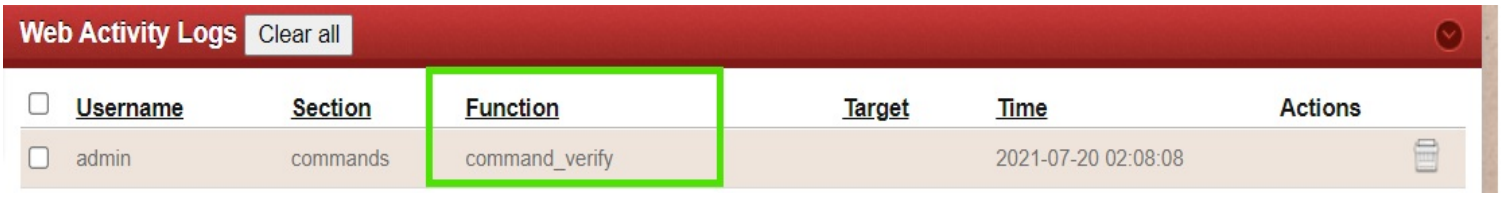

Commands > add : Command add

Commands > update : Command update

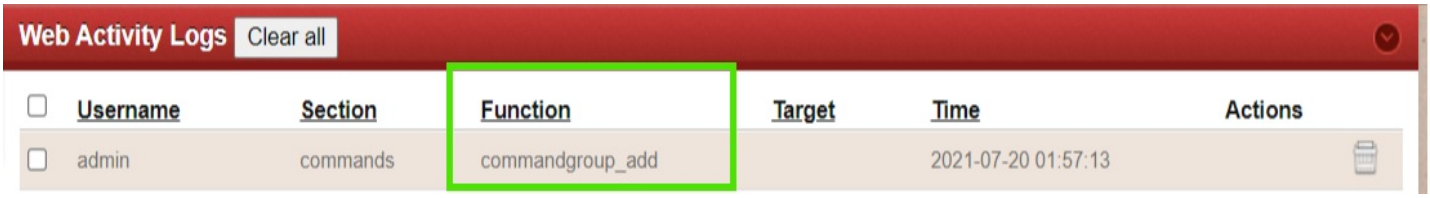

Commands > command_verify : Verify commands

Commands -> delete : Command delete

Commands > commandgroup_add : Command group add

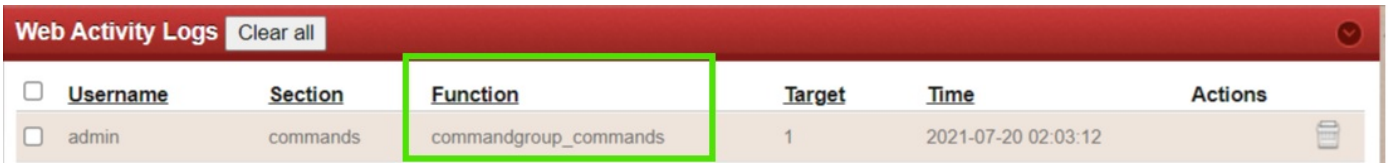

Commands > commandgroup_update : Command group update

Commands > commandgroup_delete : Command group delete

Commands > commandgroup_commands : Command group list

4. Access Control

Acls -> index : Access control list

Acls -> user_server : when you Grant User-server privilege

Acls -> usergroup_servergroup : when you Grant Usergroup-server group privilege

Acls -> user_servergroup : when you Grant User-server group privilege

Acls -> usergroup_portalgroup : when you Grant User group -portal group privilege

Acls -> user_portalgroup : when you Grant User - portal group privilege

Acls -> user_portal : when you Grant User- portal privilege

Acls -> usergroup_feature : when you Grant Usergroup- Action Privilge

Acls -> user_feature : when you Grant User-action privilege

Acls -> cancel_acl : Cancel Access control

Acls -> user_sshkey : when you Grant User- ssh keys privilege

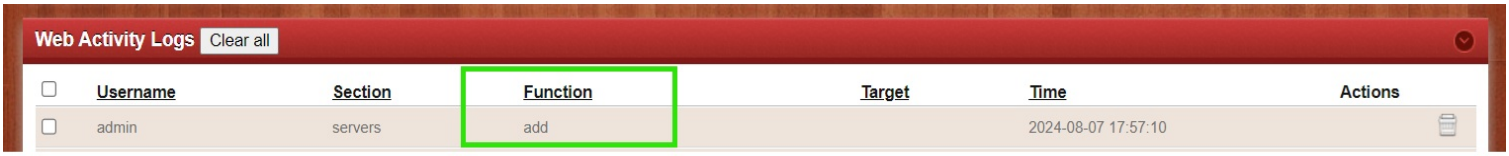

5. Server

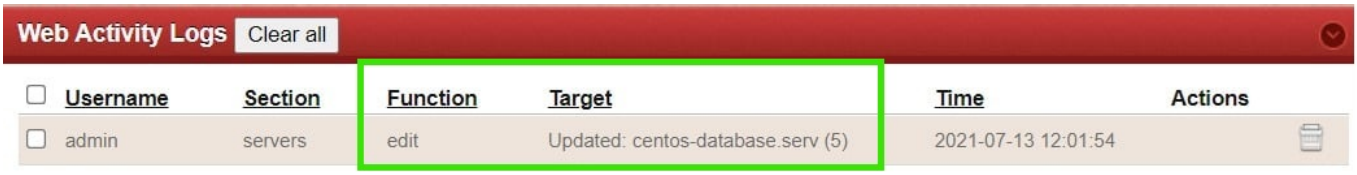

Servers -> index : When you click on the Server list

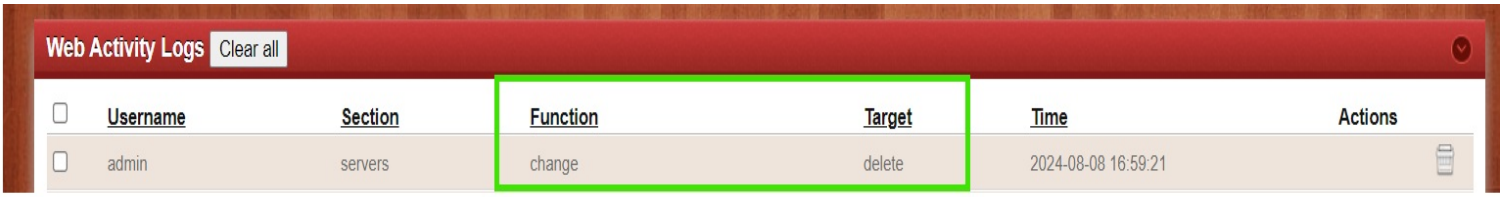

Servers -> add : when you Add server

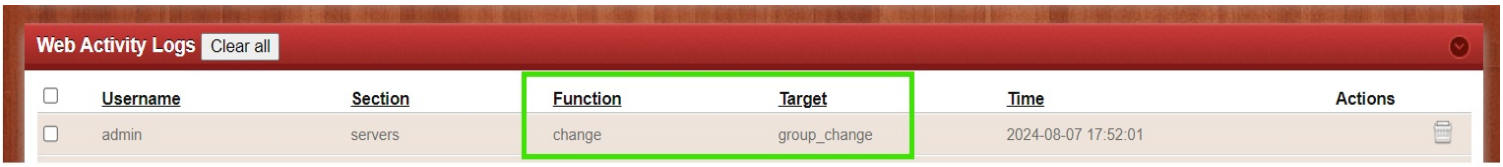

Servers -> edit : when you edit server

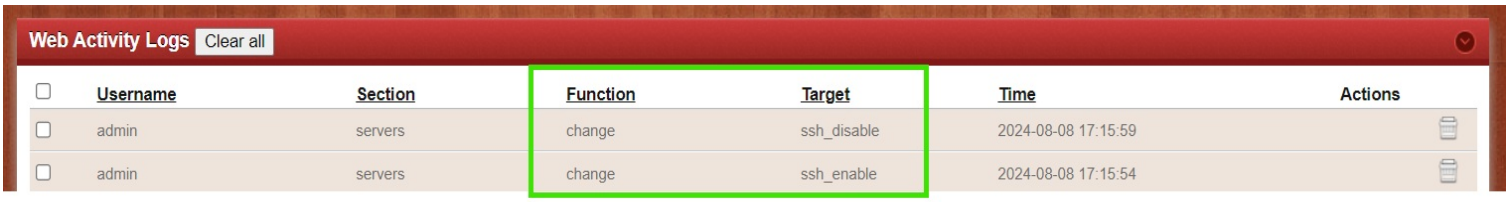

Servers -> delete : Delete server

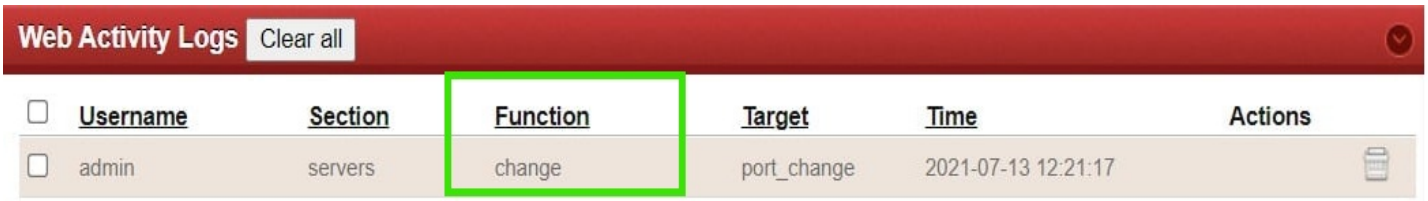

Servers -> change : Change server group

Servers -> change : when you Enable / Disable ssh connectivity

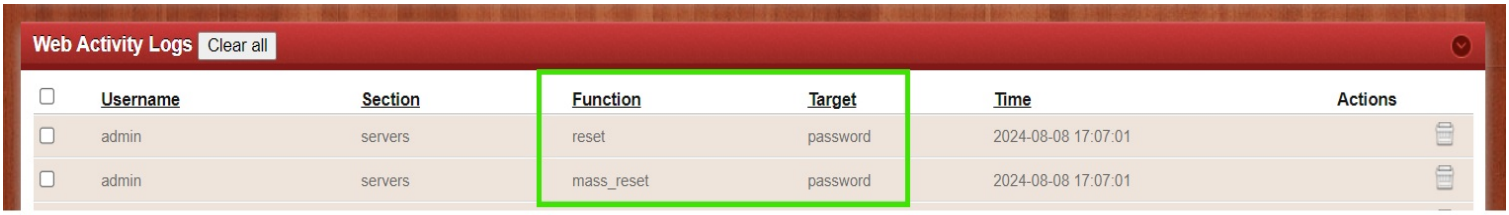

Servers -> change : Change ssh port

Servers -> change : Change ssh fingerprint

Servers -> mass_reset and Servers -> reset : Reset password on the server

Servers -> mass_reset and Servers -> reset : Setup ssh key on the server

Servers -> servergroups : View server group

Servers -> servergroup_add : Add server group

Servers -> groupmembers : View server group members

Servers -> servergroup_update : Edit server group

Servers -> servergroup_delete : when you delete server group

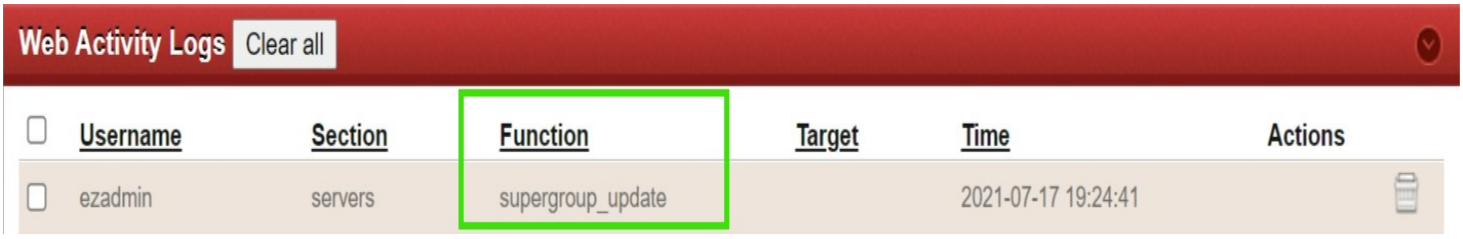

Servers -> supergroups : View server super group

Servers -> supergroup_add : Add server super group

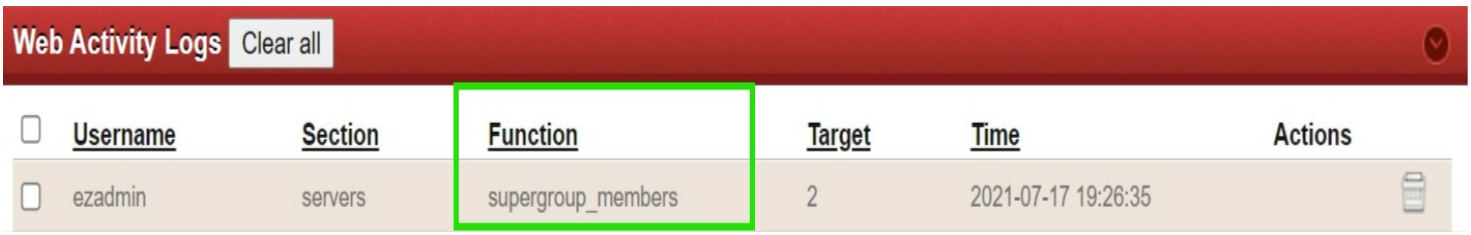

Servers -> supergroup_update : Edit server super group

Servers -> supergroup_delete : Delete server super group

Servers -> supergroup_members : Edit super group members

Servers -> mexeclists : View mexec list

Servers -> mexeclist_add : Add mexec list

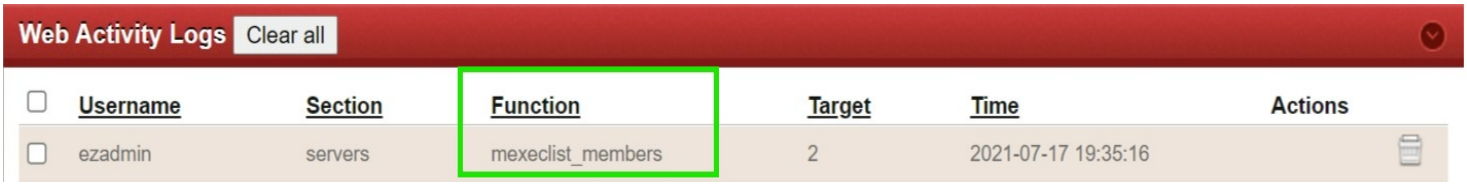

Servers -> mexeclist_update : Edit mexec list

Servers -> mexeclist_delete : Delete mexec list

Servers -> mexeclist_members : Edit mexec list members

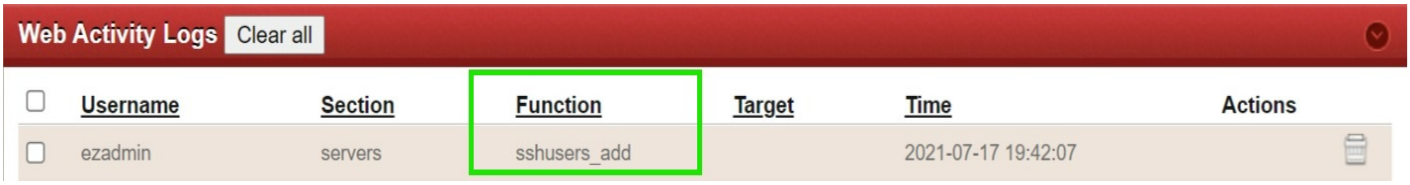

Servers -> import : View server import

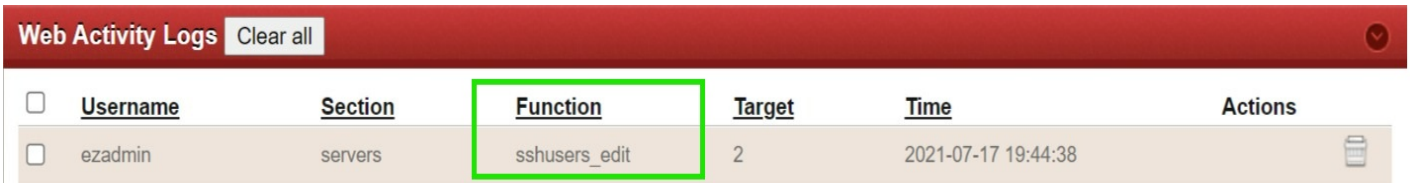

Servers -> sshusers : View subssh user

Servers -> sshusers_add : Add subssh user

Servers -> sshusers_edit : Edit subssh user

Servers -> sshusers_delete : Delete subssh user

Servers -> setup_sshusers : Setup subssh user on all server

Servers -> ssh_private_key : View key management

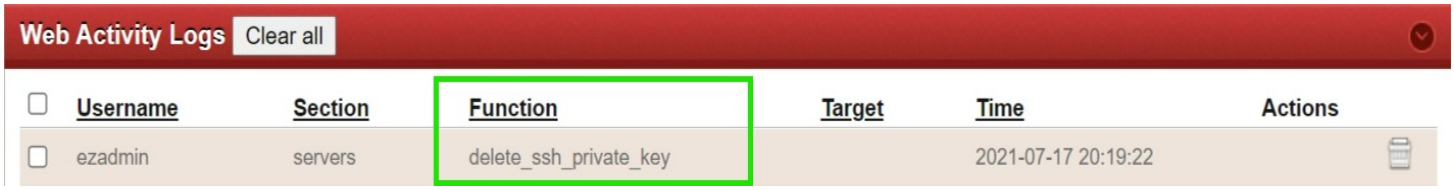

Servers -> add_ssh_private_key : Add private key in key management

Servers -> edit_ssh_private_key : Edit private key in key management

Servers -> delete_ssh_private_key : Delete private key in key management

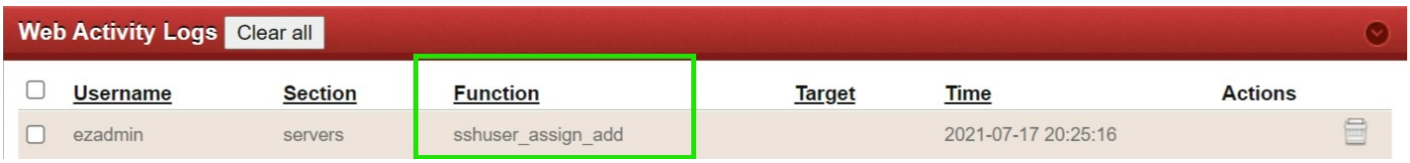

Servers -> ssh_key : View global key

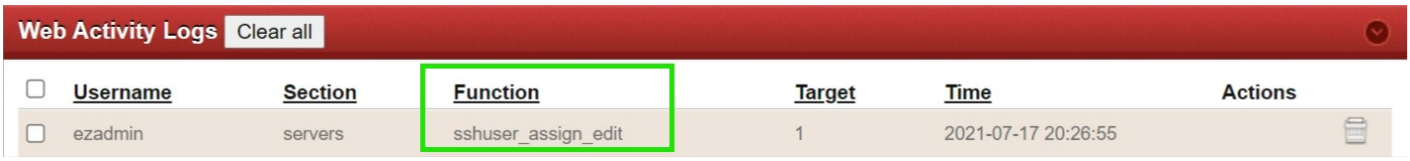

Servers -> sshuser_assign_list : Sub ssh user list

Servers -> sshuser_assign_add : Add subssh user map

Servers -> sshuser_assign_edit : Edit subssh user map

Servers -> sshuser_assign_delete : Delete subssh user map

Servers -> ssh_public_key_view : View public key in key management

6. Settings

Settings -> index : Settings index page

Settings -> addsettings : Change any settings in the general tab.

Settings -> branding : Branding tab

Settings -> logo : Logo settings in branding tab.

Settings -> reset_logo : Reset logo in logo settings in branding tab.

Settings -> background : Background settings in branding tab.

Settings -> delete_background : Delete background image in branding tab

Settings -> api : API list page in the settings tab.

Settings -> ldap : LDAP list page in the settings tab.

Settings -> ldap_add : Add LDAP / AD

Settings -> ldap_edit : Edit LDAP / AD

Settings -> ldap_delete : Delete LDAP / AD

Settings -> saml : SAML settings page

Settings -> saml_idp_metadata_fetch : SAMLmetadata fetched

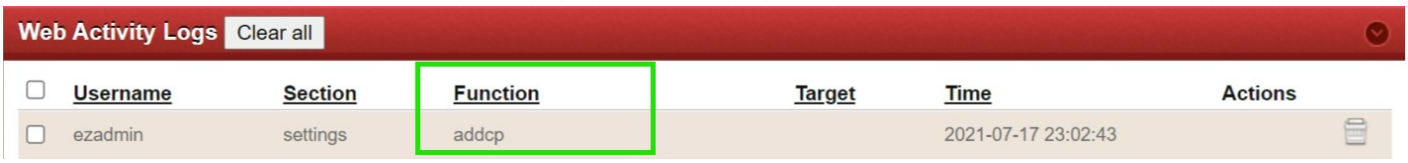

Settings -> radius : RADIUS settings page

Settings -> cpanels : Control panel list page

Settings -> addcp : Add control panel

Settings -> editcp : Edit control panel

Settings -> deletecp : Delete control panel

Settings -> datacenters : Data center list page

Settings -> adddc : Add data center

Settings -> editdc : Edit data center

Settings -> deletedc : Delete data center

Settings -> server_fields : Server field list page.

Settings -> add_server_field : Add server filed

Settings -> delete_server_field : Delete server filed

Settings -> edit_server_field : Edit server filed

Settings -> clear_radius : Clear radius settings

Settings -> clear_radius_2fa : Clear radius 2fa settings

7. Web Portals

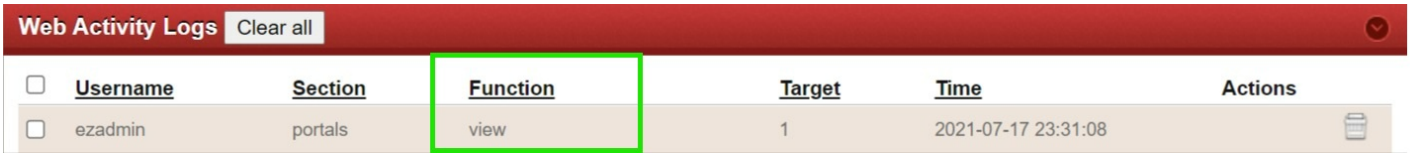

Portals -> index : Web portal list page

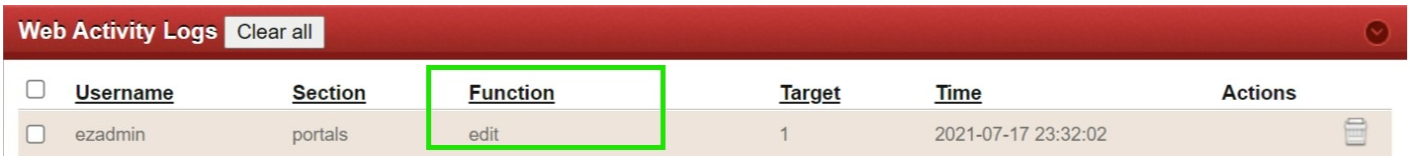

Portals -> add : Add web portal

Portals -> view : View web portal

Portals -> edit : Edit web portal

Portals -> delete : Delete web portal

Portals -> login and Portals -> autologin : Login and Autologin in the web portal

Portals -> groups : Web portal group list

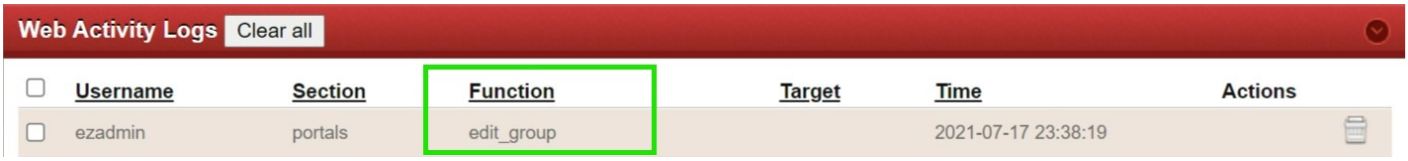

Portals -> group_members : Web portal group members list

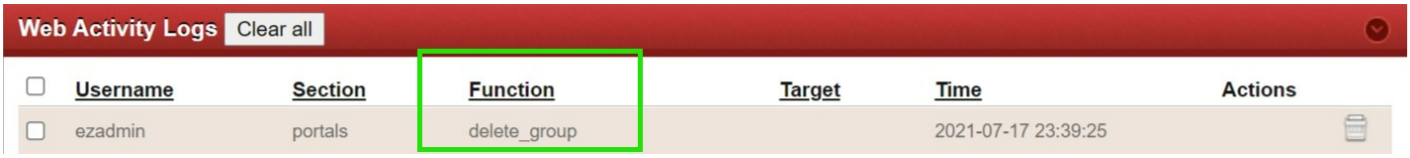

Portals -> add_group : Add web portal group

Portals -> edit_group : Edit web portal group

Portals -> delete_group : Delete web portal group

Portals -> export : Export tab in the web portal

Portals -> download_portals : Download web portal

Portals -> import : Import tab in the web portals

7. Authentication

Auth -> login and Auth -> logout : Login and logout from Ezeelogin GUI
