

Is it possible to login to Ezeelogin with a disabled AD user?

441 Nesvin KN August 12, 2021 [General](#) 1489

Will an Ezeelogin user be suspended if the corresponding user is suspended in Active Directory / LDAP?

When you suspend the AD user, the corresponding user in Ezeelogin will not be suspended however, the user will not be able to login into the Ezeelogin GUI or the ezsh shell. The user has to be suspended manually in Ezeelogin and will not be automatically synced from AD.

Refer below screenshot to suspend a user.

The screenshot displays the Ezeelogin web interface. On the left is a sidebar menu with options like Servers, Web Portals, Users, Access Control, Settings, Cluster, Command Guard, Account, Help, and License. The main area is titled 'Edit User' and contains various fields for user configuration. The 'Status' field, located on the right side, has two radio buttons: 'Active' and 'Suspended'. The 'Suspended' radio button is selected, and a green arrow points to it. Other fields include First Name (sam), Username (sam), User Group (Dummy), Expire (Never), Limit IPs, Allowed IPs, SSH Private Key, Sub SSH User, Force Password Change, Last Name, Email (sam@gmail.com), Command Guard (None), Virtual Shell, Pass User Through (Inherit), SSH Key Passphrase, LDAP (active directory), and Authorization Password. At the bottom right are 'Cancel' and 'Save' buttons.
