Resolving Duo authentication errors in ezeelogin

Overview: This article addresses the errors encountered when accessing the Ezeelogin GUI with Duo, such as "invalid_grant" and "Invalid redirect URI." Ensure to access the Ezeelogin GUI using the domain name and SSL (HTTPS) to resolve these issues.

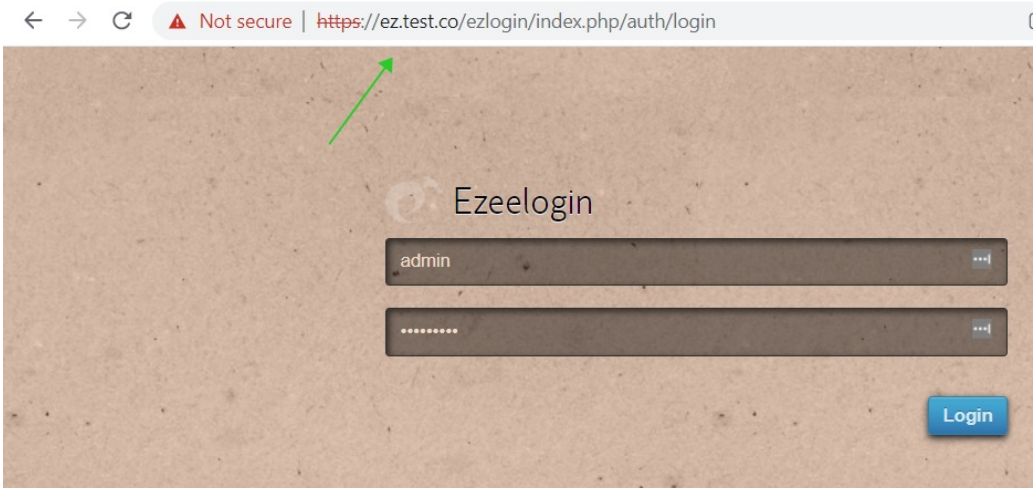

1. {"error": "invalid_grant", "error_description": "Invalid redirect URI 'http://IP/ezlogin/index.php/auth/check_duo'."}

2. An Error Was Encountered

If you get the above errors on *accessing Ezeelogin GUI while using the DUO*, make sure to access the Ezeelogin GUI with the Domain name and SSL(HTTPS) as shown below.
