

Different types of Users in Ezeelogin

465 Nesvin KN March 12, 2025 [Features & Functionalities](#) 2650

Types of users in Jumpserver.

Overview: This article describes the different types of users in Gateway server: Ezeelogin Gateway Users, Remote SSH Users, SubSSH Users, and Pass User Through.

1. Ezeelogin Gateway User

Gateway users are users who are added through the Ezeelogin GUI.

Refer to the below screenshot to add an Ezeelogin gateway user or refer to [usermanual](#).

2. Remote SSH User

Remote SSH users are the users that are logged in when SSH to the remote servers.

Refer below screenshot to add a remote SSH user.

3. SubSSH User

[Subssh users](#) are users who are created in WebGUI to log in to the remote servers as non-privileged users.

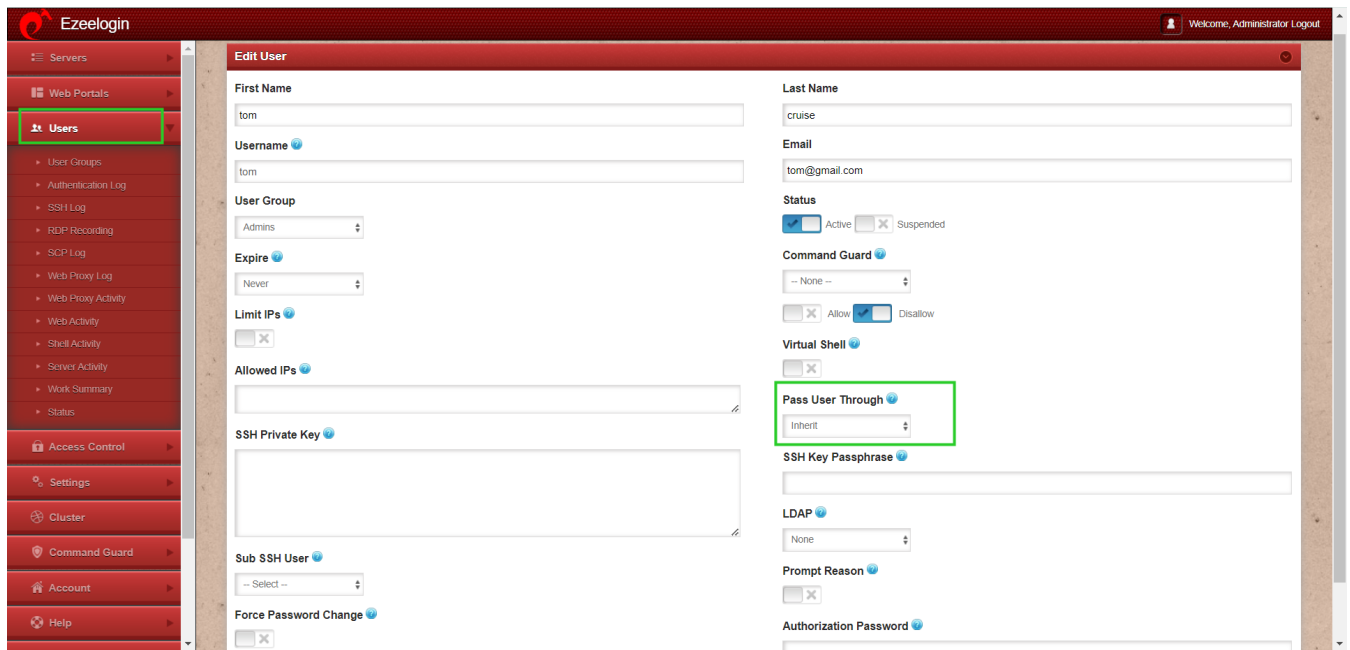

Refer to the screenshot or [article to add subssh user](#).

4. Pass User Through

Pass user through are users who can log in to a remote server as the same user logging into Web GUI.

Refer below screenshot to [enable pass user through](#).

5. Super admin user

Super admin user is the [default user account](#) created during installation, which cannot be deleted or modified, and any changes to the username require uninstalling and reinstalling Ezeelogin; however, this user can be suspended.
