Enforce password policy or complexity to the Ezeelogin user's password

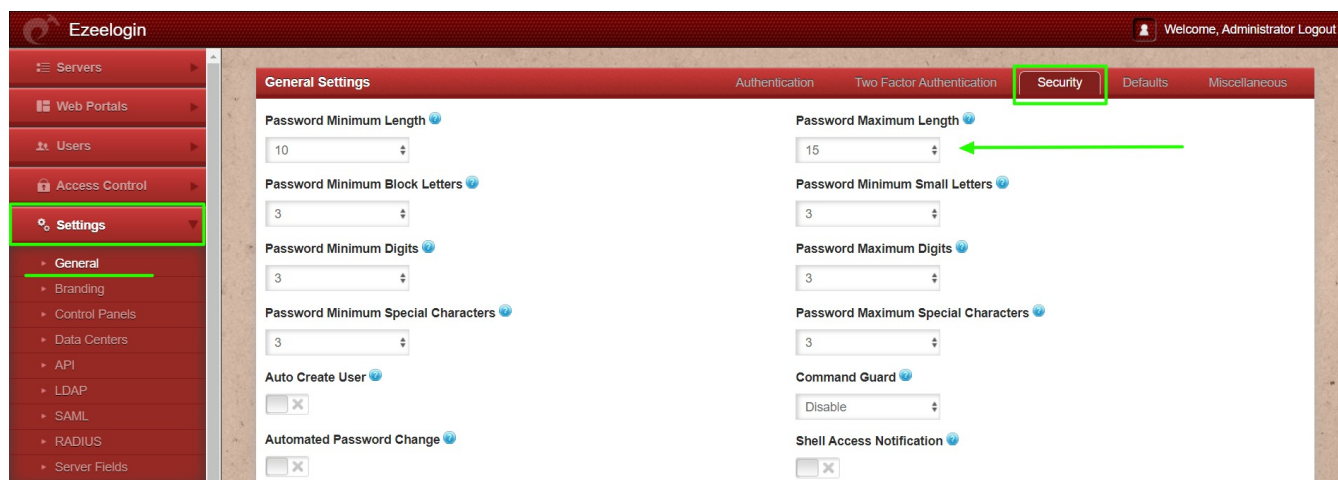

Overview: This article describes how to enforce password complexity settings for Ezeelogin users by adjusting parameters such as minimum and maximum length, digits, and special characters.

Step 1: Login to Ezeelogin GUI, navigate to **Settings** -> **General** -> [Security](#)

- **Password Minimum Length:** Set a minimum length for passwords auto-generated by Ezeelogin for root or SSH users of the remote servers, as well as for Ezeelogin gateway users.

- **Password Maximum Length:** Set a maximum length for passwords auto-generated by Ezeelogin for root or SSH users of the remote servers, as well as for Ezeelogin gateway users.

- **Password Minimum Block Letters:** Set the minimum number of block letters in the gateway

users password and remote server password.
