

Hide Server password from users

480 Jisna Joseph January 23, 2025 [Features & Functionalities](#), [Security Features](#) 3002

How to hide remote server passwords from non-privileged Ezeelogin gateway users?

Overview: This article helps admin privileged users to hide remote server passwords from non-privileged users on the Ezeelogin gateway.

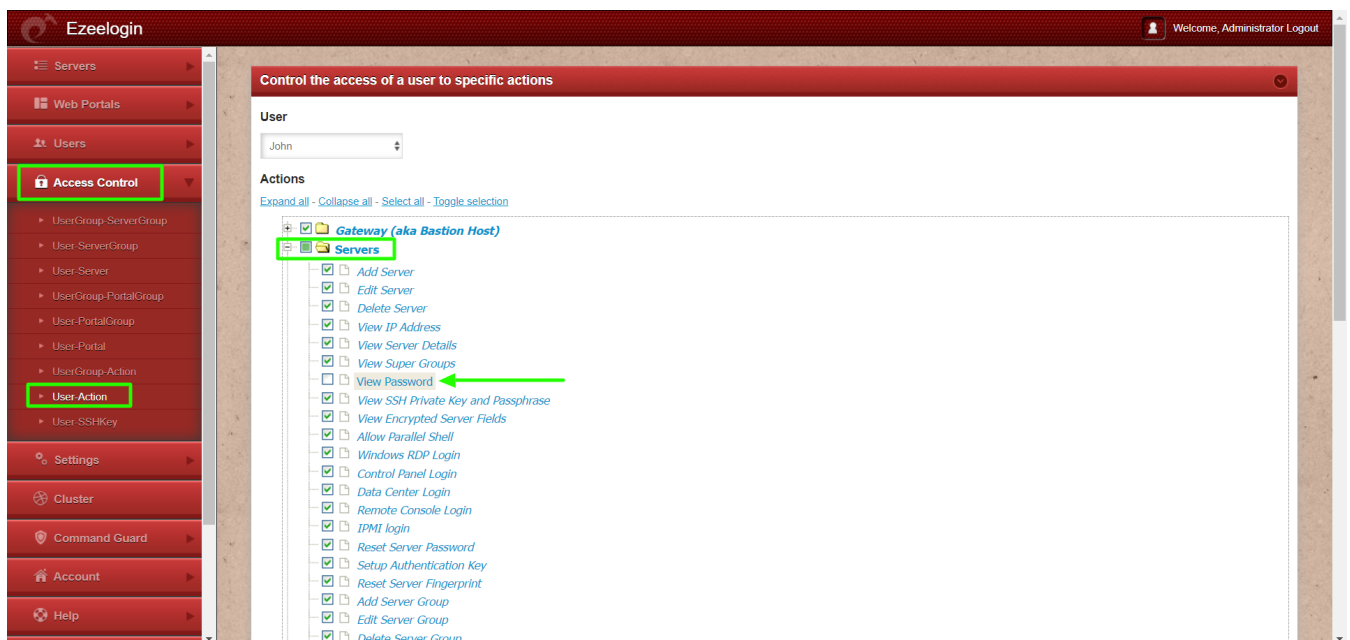

```
Server details

Name           : web.eznoc.com
IP             : 192.168.1.57
SSH port      : 22
SSH User       : root
Password       : jTKNj{KdvUXNdQadckrgAdXk2yUWRaB ←
Group          : Linux Servers

Press any key to continue...
```

Step 1: To prevent non-privileged gateway users from viewing remote server passwords from both GUI and backend, disable the "View Password" option in Access Control by navigating to **Access Control -> User Action**.

Once the "View Password" feature is disabled in Access Control, the password will no longer be visible to the user.
