

Enable/Disable 2FA [Two Factor Authentication] on Ezeelogin

489 admin January 10, 2025 [Common Errors & Troubleshooting](#) 5753

How to Enable/Disable Two Factor Authentication (2FA) on Ezeelogin Jump Server?

The SSH interface and GUI of the Gateway Server (Ezeelogin Jump Server) are now enhanced with multi-factor authentication methods, including Google Authentication, Yubikey, DUO Security, access keyword, RADIUS and FIDO2 authentication to provide robust protection for accessing your Linux servers.

Note: The QR code generation feature is currently affected by the deprecation of the Google Image Charts API, which ceased operation on March 14, 2024. To address this, kindly [update](#) to Ezeelogin version 7.37.5

Check out the following article to configure FIDO2 authentication.
