Avoid Downtime when Ezeelogin server is down

504   Jisna Joseph   June 9, 2022   [Common Errors & Troubleshooting](#)   1146

How to avoid downtime when your Ezeelogin server goes down?

1. Always take a backup of your **Ezeelogin Jump Server.** Check out the following article to create a complete backup of Ezeelogin.

https://www.ezeelogin.com/kb/article/how-to-create-a-complete-backup-of-ezeelogin-installation-70.html

2. Maintain a **Master-slave setup** so that you can use your slave node when the *master is down*. Refer the below article to *setup slave for high availability*.

https://www.ezeelogin.com/kb/article/install-slave-secondary-node-for-high-availability-in-jump-server-21.html

3. You can take an Ezeelogin **database backup** daily. Check out the below article for taking *database backup*.

https://www.ezeelogin.com/kb/article/basic-mysql-commands-for-troubleshooting-database-related-issues-in-ezeelogin-467.html
