What all features can be accessed after the expiry of Ezeelogin License?

Overview: This article specifies the features a gateway user can access after ezeelogin license expiry.

Web GUI: Users can continue logging into the Gateway server web panel and add new gateway users. However, attempting to add servers will trigger a "license expired" error.

Ezsh shell: Access to the ezsh shell remains available and users can view server details using the tab key. However, remote server access is not permitted..

You will not be able to access any other features of Ezeelogin if your license is expired.

To restore full access to all features in ezeelogin, a valid license renewal and payment is required.

For uninterrupted use and access to all features, maintaining an active license is recommended.
