### What all features can be accessed after Ezeelogin License Expiry?

If your Ezeelogin license is expired you will still be able to login to the Ezeelogin GUI and you will be able to add users to the Ezeelogin GUI but if you try to add a server you will get license expired error.

You can login to the Ezsh shell and can view the server details by clicking the tab key, However, you cannot access the remote servers. You will not be able to access any other features of Ezeelogin If your license is expired. You can continue using Ezeelogin and all its features after a successful payment
