How to add litespeed as webportal in gateway server for autologin?

Overview: This article describes how to add litespeed as webportal in gateway server with autologin.

[Webproxy, Webpanel, Webportal, Controlpanel](#)

To add LiteSpeed as web portal in gateway server for autologin, [install lightspeed](#) in a server.

Step 1: Follow the below steps to add LiteSpeed as a web portal for autologin.

Paste the login URL and then click on the **Fetch details** button. Then the details of the LiteSpeed automatically get fetched.

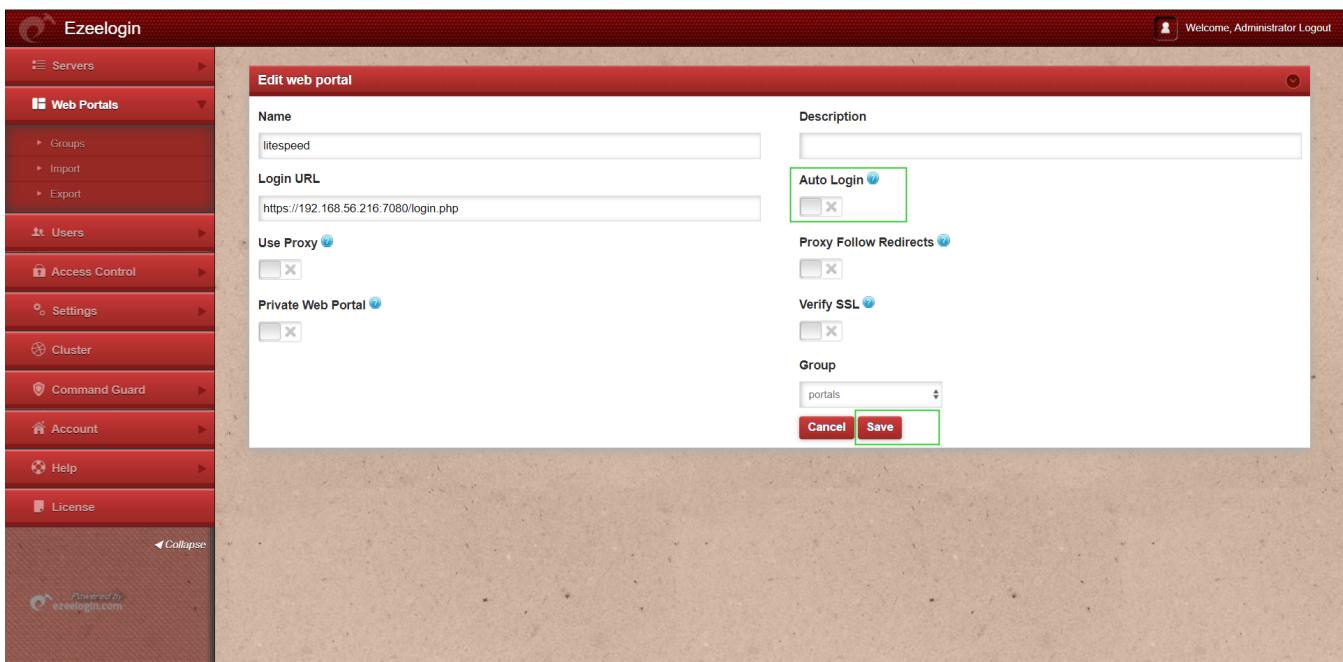

The screenshot shows the Ezeelogin web interface. On the left is a sidebar with various menu items: Servers, Web Portals (selected), Groups, Import, Export, Users, Access Control, Settings, Cluster, Command Guard, Account, Help, and License. Below the sidebar is a note: "Powered by ezeelogin.com". The main area is titled "Edit web portal" and contains a form for configuring a web portal named "litespeed". The form includes fields for Name, Description, Login URL (https://192.168.56.216.7080/login.php), Host (192.168.56.216), Port (7080), Request URI (/login.php), Username (userid), Password (pass), and Group (portals). It also includes checkboxes for Use Proxy (checked), Protocol (HTTPS), Request Method (POST), Auth Type: Basic, and Proxy Follow Redirects. There are "Cancel" and "Save" buttons at the bottom. A note says "Note: HTTPS is highly recommended."

Fill in the other details such as username filed selector and password filed selector. Then **save** it.

Step 2: For Litespeed autologin to work, enable **Use proxy**.
