Compile and install libssh and ssh2

540 Nesvin KN October 7, 2022 General 5211

How to compile and install libssh (1.10.0) and ssh2 (1.3.1) in Ubuntu 18, 20, 22, and Centos 7, 8?

1. Download required packages:

```
root@gateway ~]# wget https://libssh2.org/download/libssh2-1.10.0.tar.gz

root@gateway ~]# wget https://pecl.php.net/get/ssh2-1.3.1.tgz
```

2. Compile and install **libssh 1.10.0**

```
root@gateway ~]# tar vxzf libssh2-1.10.0.tar.gz

root@gateway ~]# cd libssh2-1.10.0

root@gateway ~]# ./configure

root@gateway ~]# make

root@gateway ~]# make install
```

3. Compile and install **ssh2 1.3.1**

```
root@gateway ~]# tar vxzf ssh2-1.3.1.tgz

root@gateway ~]# cd ssh2-1.3.1

root@gateway ~]# phpize

root@gateway ~]# ./configure --with-ssh2

root@gateway ~]# make

root@gateway ~]# make install
```
