How to integrate Ezeelogin with WAF (Web Application Firewall) like Cloudflare?

Append below lines in **/usr/local/etc/ezlogin/ez.conf**

```
root@gateway ~]# vim /usr/local/etc/ezlogin/ez.conf

host_url  http://your_domain_name
cookie_match_ip 0
```

Note: If you have enabled HTTPS you should add host_url https://your_domain_name
