internal command ezinfo not displaying server details

Internal command ezinfo not displaying server details

- Make sure the user has been granted the privilege to '**view the server details**' under **Access-Control >> User-Action**
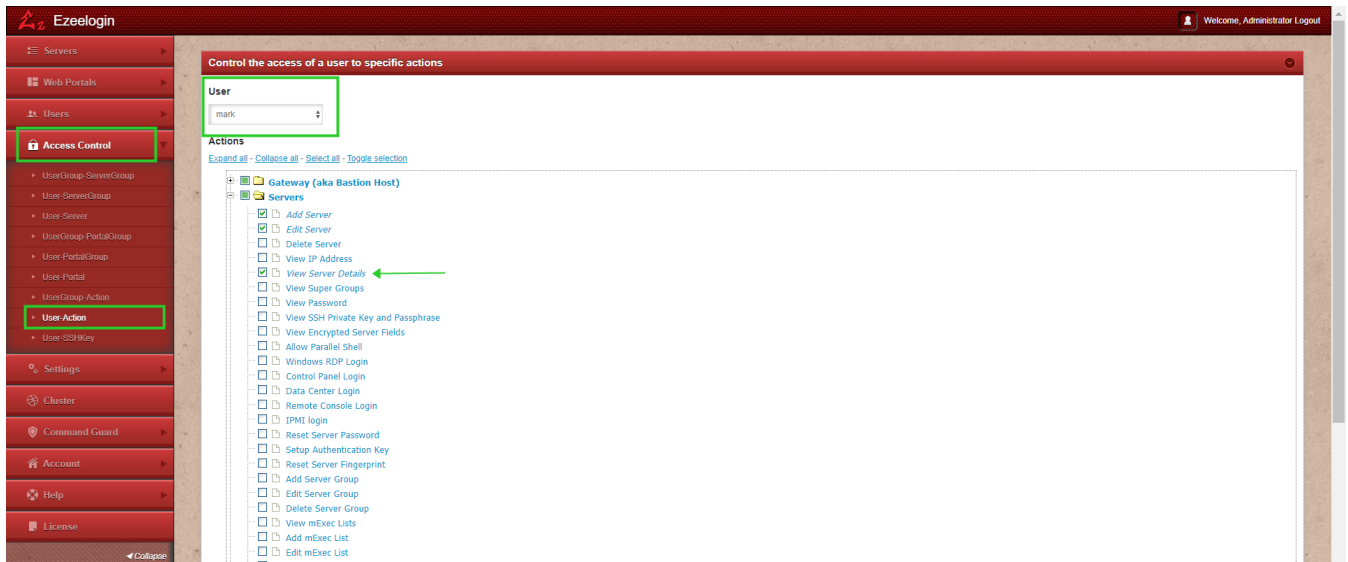

- Also make sure that the under **Settings->General->Security,** the '**hide server details'** box is unchecked as well.

  h[ttps://www.ezeelogin.com/user_manual/Security.html](https://www.ezeelogin.com/user_manual/Security.html)

Once the changes has been changed, the user would need to relogin into the ezeelogin gateway so that ezinfo works.
