Adding Cyberpanel as webportal in Ezeelogin for autologin

Overview: This article explains how to add CyberPanel as a web portal in Ezeelogin with both autologin enabled and disabled.

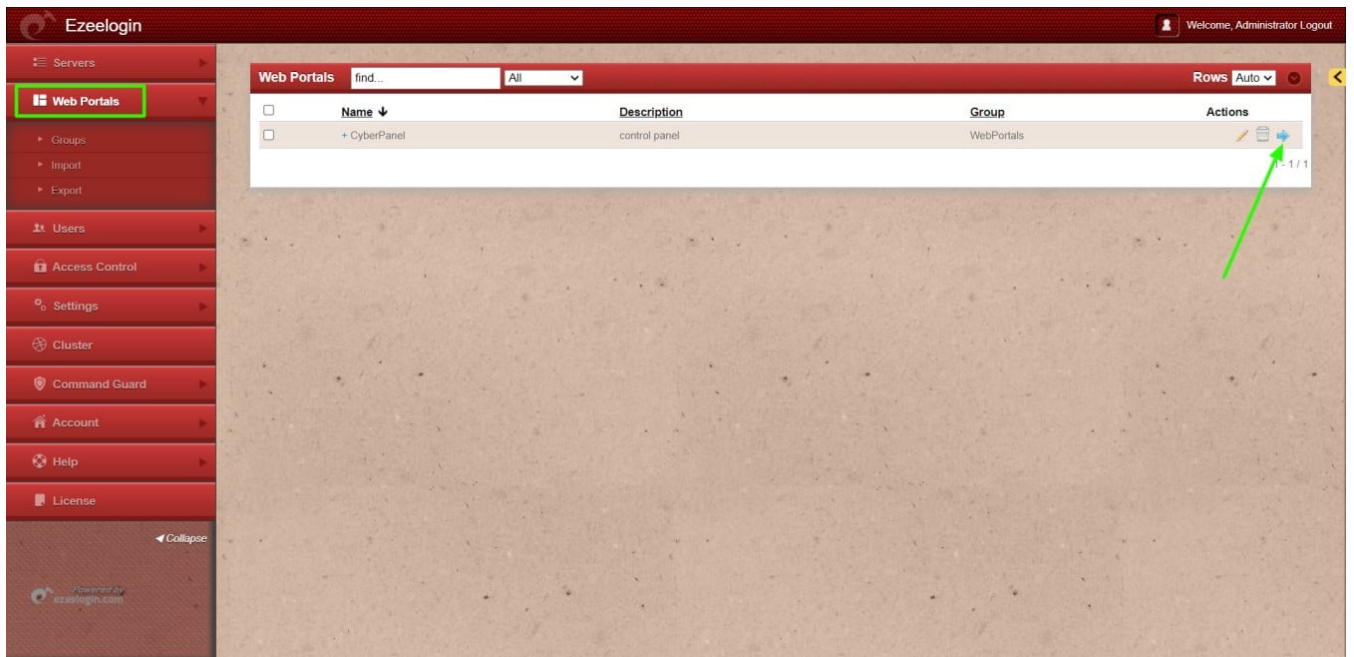

Step 1: Install [cyberpanel](#) in a server and follow the below steps.

Step 2: Login to web GUI -> Click on **Web Portals** tab -> **Add new Web Portal** with **Auto Login** enabled. Refer below screenshots to add Cyberpanel.

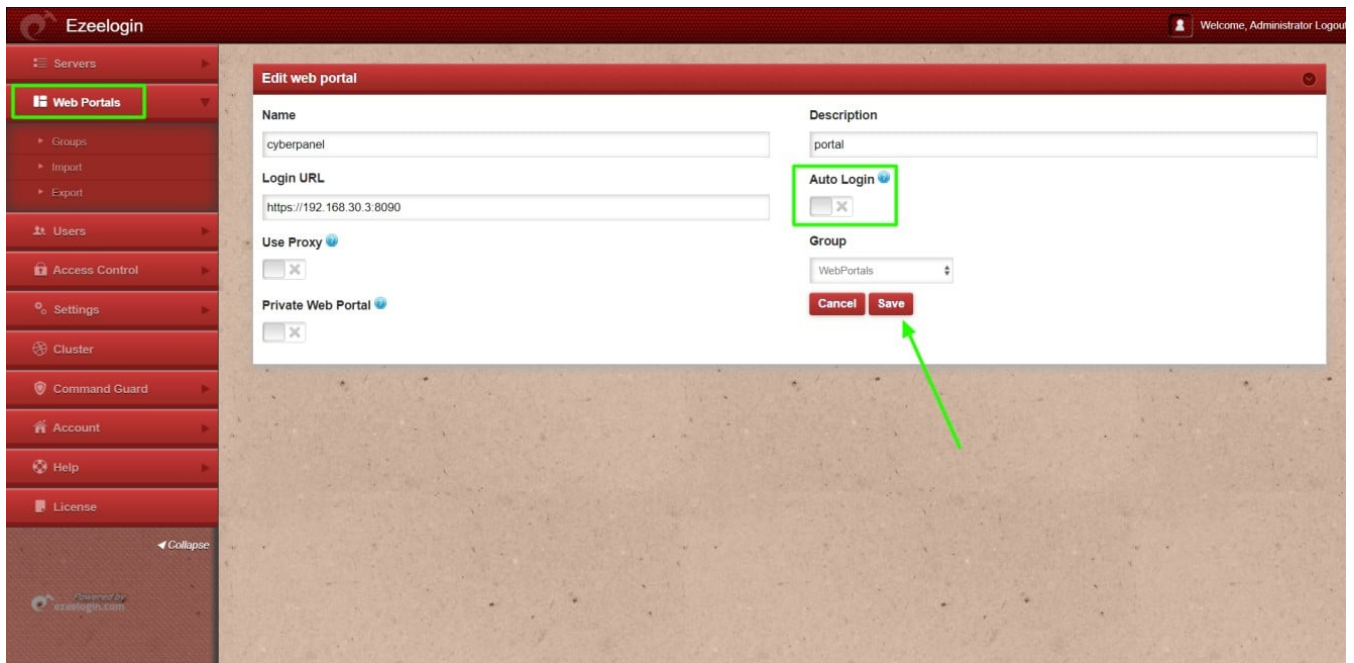

The top screenshot shows the Ezeelogin web interface. On the left sidebar, the 'Web Portals' tab is highlighted. The main content area displays a table of web portals. The table has columns for 'Name', 'Description', 'Group', and 'Actions'. There are two entries: 'CWP' and 'PLESK', both belonging to the 'Web Portals' group. A green arrow points to the 'Add' button in the 'Actions' column for the 'CWP' entry.

The bottom screenshot shows the 'Edit web portal' form for 'CWP'. The form has two columns of fields. The left column contains fields for 'Name' (cyberpanel), 'Login URL' (https://192.168.30.3:8090), 'Fetch details', 'Use Proxy' (checked), 'Host' (192.168.30.3), 'Port' (8090), 'Request URI' (/), 'Username' (admin), 'Username Field' (username), 'Username Field Selector', 'Submit Button Selector', 'Extra Variables', and 'Private Web Portal' (unchecked). The right column contains fields for 'Description' (portal), 'Auto Login' (checked), 'Advanced Proxy' (checked), 'Protocol' (HTTPS), 'Request Method' (GET), 'Auth Type: Basic' (unchecked), 'Password' (admin@2040), 'Password Field' (password), 'Password Field Selector', 'Proxy Follow Redirects' (unchecked), 'Verify SSL' (unchecked), and 'Group' (WebPortals). A green arrow points to the 'Auto Login' checkbox, which is checked. Another green arrow points to the 'Save' button at the bottom right of the form.

Step 3: After saving, click the Login button to access CyberPanel.

Step 4: To access CyberPanel without autologin, refer to the screenshot below to disable the AutoLogin option.

Cyberpanel will work only from [Ezeelogin version 7.29.10](#)

To **troubleshoot** issues related to the web portal, refer to Step 4 in the article linked below:
