

Mosh disallowed

616 Rakhi April 1, 2025 [Common Errors & Troubleshooting](#) 1716

/usr/bin/mosh: Did not find mosh server startup message. (Have you installed mosh on your server.)

Overview: This article provides steps to resolve the issue when Mosh is disallowed while attempting to use it for remote shell access.

```
root@AD-LAPLEN-11: ~  
root@AD-LAPLEN-11:~# mosh tony@192.168.0.113  
tony@192.168.0.113's password:  
  
Mosh disallowed  
Connection to 192.168.0.113 closed.  
/usr/bin/mosh: Did not find mosh server startup message. (Have you installed mosh on your server?)  
root@AD-LAPLEN-11:~#
```

When trying to connect using Mosh, the following error message may appear:

```
/usr/bin/mosh: Did not find mosh server startup message. (Have you  
installed mosh on your server?)
```

This error occurs when:

- Mosh is not installed on the server.
- Mosh service is not enabled in the Ezeelogin GUI.

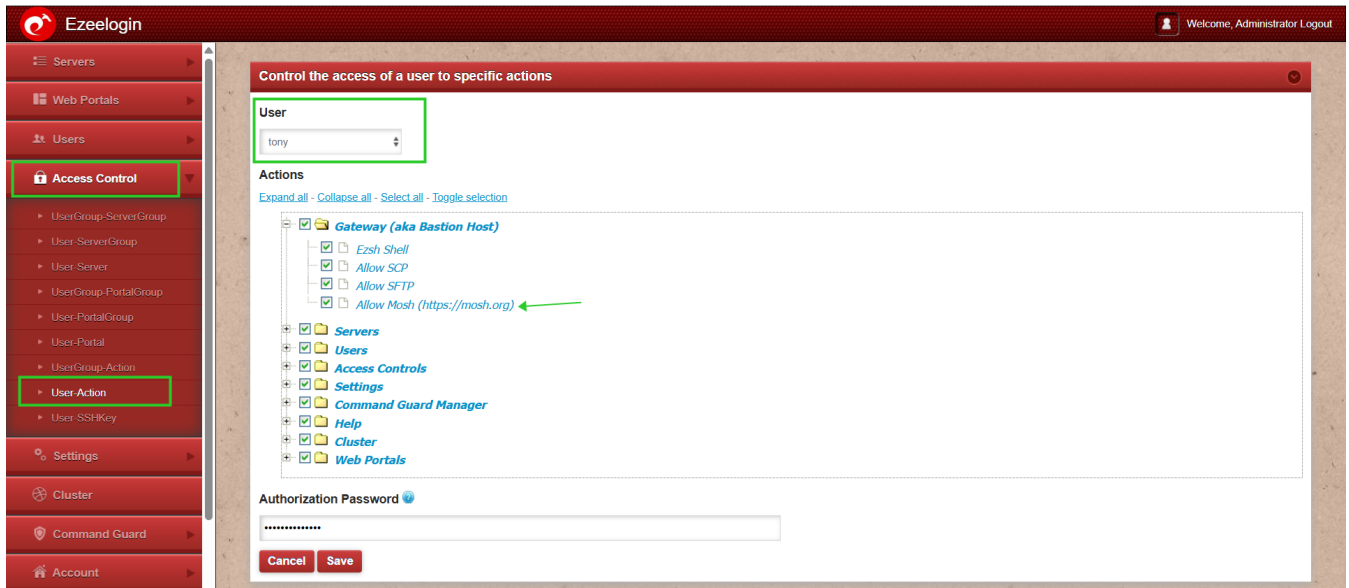

How to **enable mosh service** for the admin user.

Step 1: Ensure Mosh is installed on your Gateway machine by running:

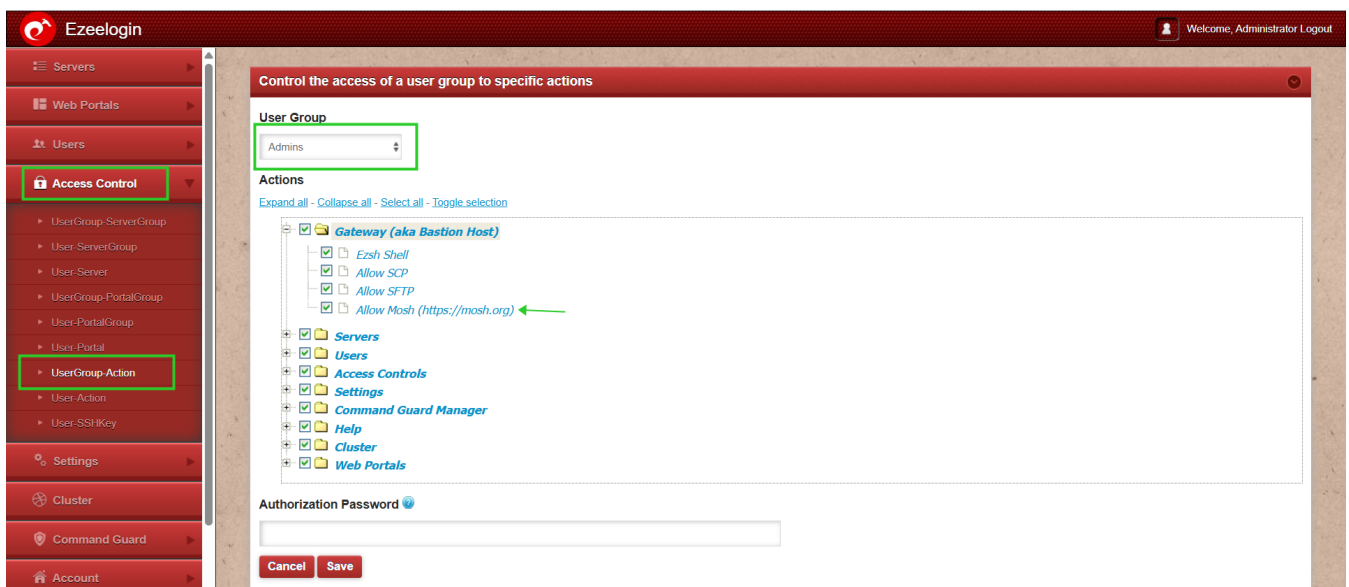

```
root@gateway:~# apt-get install mosh
```

Step 2: To **enable mosh service** on your machine you need to enable it.

Navigate to **Access Control > User Action**. Select the users who require access and enable **Allow Mosh**.

Step 3: Verify that **Admin** or required group users have permission under **Access Control > User Group-Action**.

Step 4: Once enabled, try connecting to the server using Mosh:
